Ai-Based X-ray Baggage Inspection System

TW5030(AI)

The TW5030(AI) X-ray security inspection system is a new generation X-ray security inspection system that integrates multi-functions such as intelligent detection, baggage connection, etc. This model is applicable to be deployed in scenarios such as office buildings, large events, courts, prisons, embassies, factories, schools, hospitals, public places, etc. The size of the tunnel is suitable for small parcels, backpacks, envelopes, handbags, etc.

- **Intelligent Recognition:** Integrated with the advanced detection algorithm, which could alarm on concealed suspicious items automatically.
- **Remote Management:** Network integration supported real time status, X-ray images, videos, alarm information can be viewed remotely through Network, and report can be viewed and downloaded remotely for better management process.
- **Event-Trace:** History events, X-ray images, photos and related videos can be reviewed through documentation management.
- **Compact Design:** Compact design with built-in diagnostic facility for easy maintenance.
- **Radiation Safe:** X-ray leakage is close to the natural background level, which can comply with all the published international health and safety standards
