

User Manual

TrueFace1000D

V1.0.1

Foreword

General

This manual introduces the functions and operations of the Face Recognition Access Controller (hereinafter referred to as the "Device"). Read carefully before using the device, and keep the manual safe for future reference.

Safety Instructions

The following signal words might appear in the manual.

Signal Words	Meaning
 DANGER	Indicates a high potential hazard which, if not avoided, will result in death or serious injury.
 WARNING	Indicates a medium or low potential hazard which, if not avoided, could result in slight or moderate injury.
 CAUTION	Indicates a potential risk which, if not avoided, could result in property damage, data loss, reductions in performance, or unpredictable results.
 TIPS	Provides methods to help you solve a problem or save time.
 NOTE	Provides additional information as a supplement to the text.

Revision History

Version	Revision Content	Release Time
V1.0.1	Revised important safeguards and warnings.	August 2024
V1.0.0	First release.	July 2024

Privacy Protection Notice

As the device user or data controller, you might collect the personal data of others such as their face, audio, fingerprints, and license plate number. You need to be in compliance with your local privacy protection laws and regulations to protect the legitimate rights and interests of other people by implementing measures which include but are not limited: Providing clear and visible identification to inform people of the existence of the surveillance area and provide required contact information.

About the Manual

- The manual is for reference only. Slight differences might be found between the manual and the product.
- We are not liable for losses incurred due to operating the product in ways that are not in compliance with the manual.
- The manual will be updated according to the latest laws and regulations of related jurisdictions. For detailed information, see the paper user's manual, use our CD-ROM, scan the QR code or visit our official website. The manual is for reference only. Slight differences might be found between the electronic version and the paper version.

Important Safeguards and Warnings

This section introduces content covering the proper handling of the Device, hazard prevention, and prevention of property damage. Read carefully before using the Device, and comply with the guidelines when using it.

Transportation Requirement

Transport, use and store the Device under allowed humidity and temperature conditions.

Storage Requirement

Store the Device under allowed humidity and temperature conditions.

Installation Requirements

- Do not connect the power adapter to the Device while the adapter is powered on.
- Strictly comply with the local electric safety code and standards. Make sure the ambient voltage is stable and meets the power supply requirements of the Device.
- Do not connect the Device to two or more kinds of power supplies, to avoid damage to the Device.
- Improper use of the battery might result in a fire or explosion.
- Please follow the electrical requirements to power the Device.
 - ◊ Following are the requirements for selecting a power adapter.
 - The power supply must conform to the requirements of IEC 60950-1 and IEC 62368-1 standards.
 - The voltage must meet the SELV (Safety Extra Low Voltage) requirements and not exceed ES-1 standards.
 - When the power of the device does not exceed 100 W, the power supply must meet LPS requirements and be no higher than PS2.
 - ◊ We recommend using the power adapter provided with the Device.
 - ◊ When selecting the power adapter, the power supply requirements (such as rated voltage) are subject to the Device label.

- Personnel working at heights must take all necessary measures to ensure personal safety including wearing a helmet and safety belts.
- Do not place the Device in a place exposed to sunlight or near heat sources.
- Keep the Device away from dampness, dust, and soot.
- Install the Device on a stable surface to prevent it from falling.
- Install the Device in a well-ventilated place, and do not block its ventilation.
- Use an adapter or cabinet power supply provided by the manufacturer.

+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

- Use the power cords that are recommended for the region and conform to the rated power specifications.
- The Device is a class I electrical appliance. Make sure that the power supply of the Device is connected to a power socket with protective earthing.
- The Device must be installed at a height of 2 meters or below.

Operation Requirements

- Check whether the power supply is correct before use.
- Ground the device to protective ground before you power it on.
- Do not unplug the power cord on the side of the Device while the adapter is powered on.
- Operate the Device within the rated range of power input and output.
- Use the Device under allowed humidity and temperature conditions.
- Do not drop or splash liquid onto the Device, and make sure that there is no object filled with liquid on the Device to prevent liquid from flowing into it.
- Do not disassemble the Device without professional instruction.
- This product is professional equipment.
- The Device is not suitable for use in locations where children are likely to be present.

1 Overview

The Device is an access control panel that supports unlocking through faces, passwords, fingerprints, cards, and their combinations. Based on the deep-learning algorithm, it features faster recognition and higher accuracy. It can work with management platform which meets various needs of customers.

It is widely used in parks, communities, business centers and factories, and ideal for places such as office buildings, government buildings, schools and stadiums.

- Configurations might differ depending on the models of the product.
- Some models support connecting extension modules like fingerprint module and more. The type of extension modules that the Device supports might differ.

Input the letter

This part uses entering M as the example.

1. Press the 6 button on the input box.
2. Press the 4 button.

Input the number

Change to the number input method, and then press the corresponding number button.

Input the character

Change to the character input method, and then press the corresponding number button.

Press  or  to change to previous or next page of characters.

2.2 Initialization

Background Information

For the first-time use or after restoring factory defaults, you need to select a language on Access Controller, and then set the password and email address for the admin account. You can use the admin account to enter the main menu of the Access Controller and its webpage.

Procedure

Step 1 Select the language, and then press the OK key.

Step 2 Press  to select **Enter Password**, and then press OK.

Step 3 Configure the password, and then press OK.

- The input method is the letter method by default. Press  to change to the number method.
- Enter the letter: Press the corresponding letter key, and then press the number to select the letter. For example, if you want to enter the letter a, you need to press the 2 key, and then press the 1 key.

- If you forget the administrator password, send a reset request to your registered e-mail address.
- The password must consist of 8 to 32 non-blank characters and contain at least two types of characters among upper case, lower case, number, and special character (excluding ' " ; : &).

Step 4 Press  to select **Confirm Password**, and then press OK.

Step 5 Repeat Step 3, enter the same password, and then press OK.

Step 6 Enter the email address, and then select the time zone.

Step 7 Press  to select , and then press OK.

2.3 Home Screen

Figure 2-3 Home screen

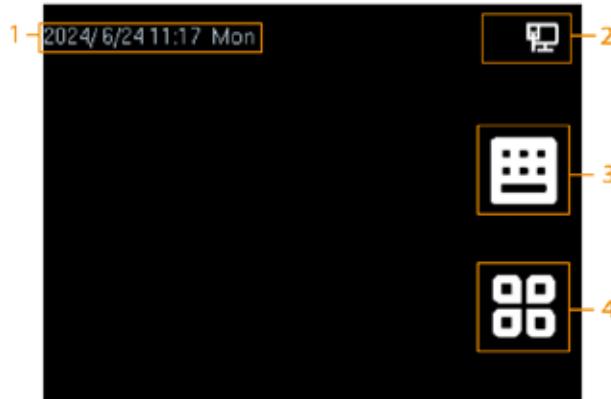

Table 2-2 Home screen description

No.	Description
1	Displays the current date, time and day.
2	 Displays the network connection status. <small>The Wi-Fi and Wi-Fi AP function are available on select models.</small>
3	Unlock by password: Enter the user password, temporary password or admin password to open the door.
4	Main menu: Select the icon using the button, and then select the verification method to view the main menu.

2.4 Unlocking Methods

You can unlock the door through faces, passwords, fingerprints, cards, and more.

2.4.1 Unlocking by Cards

Place the card at the swiping area to unlock the door.

This function is only available on select models.

2.4.2 Unlocking by Fingerprint

Place your finger on the fingerprint scanner to unlock the door.

(+91)-11-41916615

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

This function is only available on select models.

2.4.3 Unlocking by Face

Verify the identity of an individual by detecting the face. Make sure that the face is centered on the face detection frame.

Do not wear the mask during the verification.

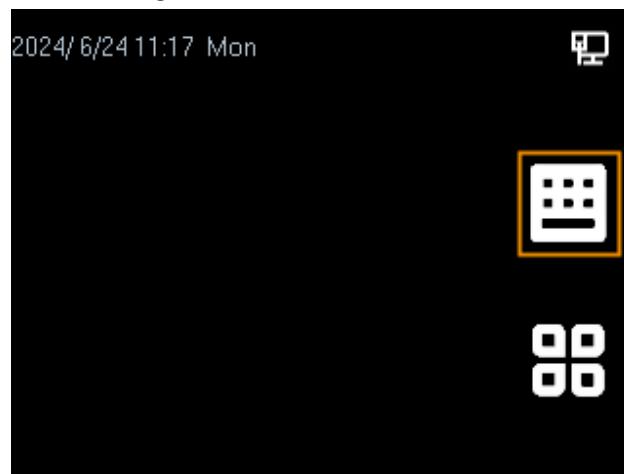

2.4.4 Unlocking by User Password

Enter the user ID and password to unlock the door.

Procedure

Step 1 Press or to select and then press OK.

Figure 2-4 Home screen

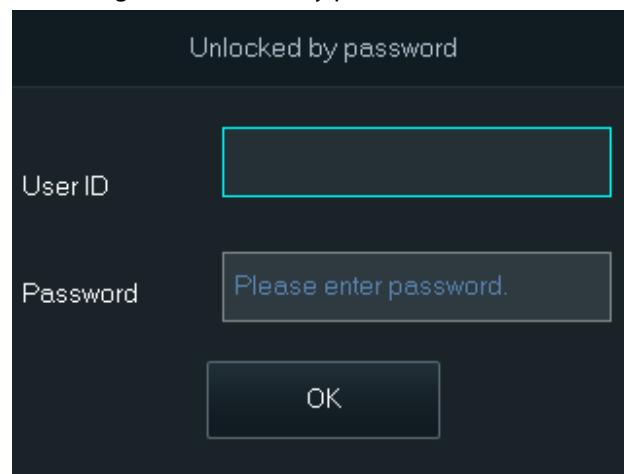

Step 2 Select **Unlocked by password**, and then press OK.

Step 3 Enter the registered or delivered user ID and password.

After the successful verification, you can unlock the door.

Figure 2-5 Unlock by password

sales@timewatchindia.com
www.timewatchindia.com

Step 4 Select **OK**, and then press OK.

2.4.5 Unlocking by Admin Password

Enter only the admin password to unlock the door. The door can be unlocked through admin password except for always closed door. One device allows for only one admin password.

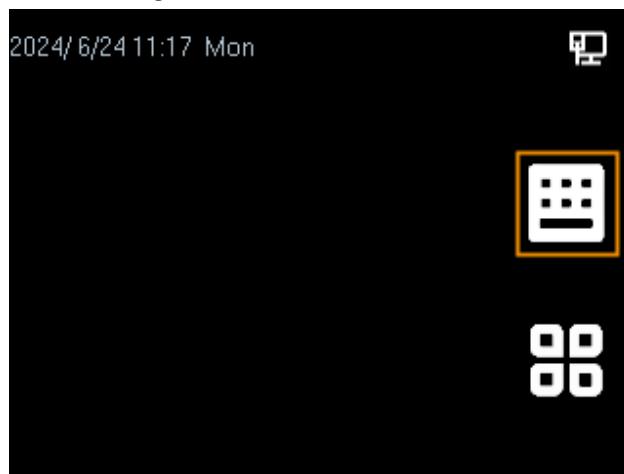

Prerequisites

The admin password was configured. For details, see "2.6.3 Configuring the Admin Unlock Password".

Procedure

Step 1 Press  or  to select , and then press OK.

Figure 2-6 Home screen

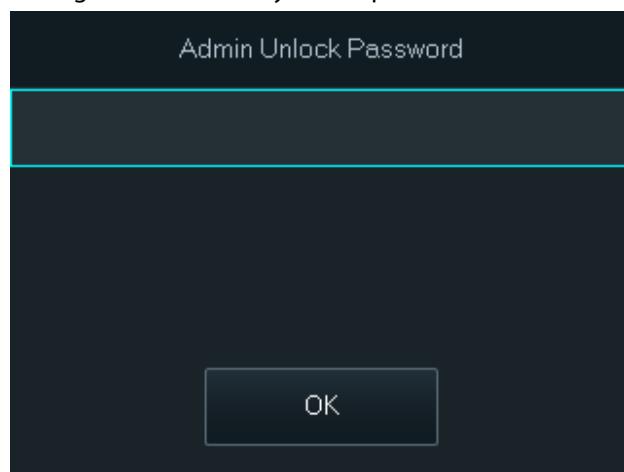

Step 2 Select **Admin Unlock Password**, and then press OK.

Step 3 Enter the admin password, select **OK**, and then press OK.

After the successful verification, you can unlock the door.

Figure 2-7 Unlock by admin password

sales@timewatchindia.com
www.timewatchindia.com

2.4.6 Unlocking by Temporary Password

Unlock the door by the temporary password.

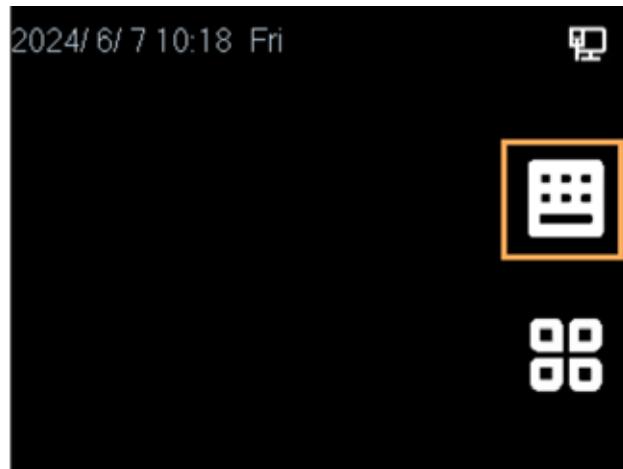

Procedure

- Step 1 Add the Device to DMSS.

DMSS will generate a temporary password, which allows you unlock the door before it expires.

- Step 2 Press  or  to select , and then press OK.

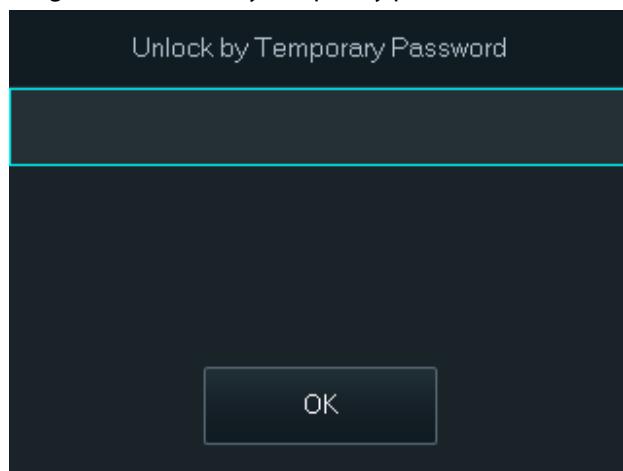

Figure 2-8 Home screen

- Step 3 Select **Temporary Password**, and then press OK.

- Step 4 Enter the temporary password, select **OK**, and then press OK.

Figure 2-9 Unlock by temporary password

2.5 Logging in

Log in to the main menu to configure the Access Controller. For the first-time use, use the admin account to enter the main menu screen and then you can create other administrator accounts.

Procedure

- Step 1 Press  or  to select , and then press OK.

Figure 2-10 Home screen

- Step 2 Press or to select **admin**, and then press OK.
- Step 3 Press OK, and then enter the password that is configured during the initialization.
- Step 4 Press or to select **OK**, and then press OK.

2.6 Person Management

You can add new users, view user/admin list and edit user information.

The pictures in this manual are for reference only, and might differ from the actual product.

2.6.1 Adding Users

Add the new user, configure the name, face, fingerprint, permission, validity period, and other information.

Procedure

- Step 1 On the **Main Menu**, select **Users > Create User**.
- Step 2 Configure the parameters on the interface.

Figure 2-11 Add the user

Create User(1/3)		Create User(2/3)		Create User(3/3)	
No.	4	Password		User Type	General User
Name		User Permission	User	Department	1-Default
Fingerprint	0	Period	255-Default	Schedule Mode	Dept Schedule
Face	0	Holiday Plan	255-Default		
Card	0	Validity Period	2037-12-31		

Table 2-3 Parameters description

Parameter	Description
No.	The No. is like employee ID, which can be numbers, letters, and their combinations, and the maximum length of the No. is 32 characters.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Parameter	Description
Name	The name can have up to 30 characters (including numbers, symbols, and letters).
Fingerprint	<p>Register fingerprints. A user can register up to 3 fingerprints, and you can set a fingerprint to the duress fingerprint. An alarm will be triggered when the duress fingerprint is used to unlock the door.</p> <p></p> <ul style="list-style-type: none"> • Fingerprint function is only available on select models. • We do not recommend you set the first fingerprint as the duress fingerprint. • One user can only set one duress fingerprint. • Fingerprint function is available if the Access Controller supports connecting a fingerprint extension module.
Face	Position your face inside the frame, and a face image will be captured automatically. You can register again if you are not satisfied with the outcome.
Card	<p>A user can register up to 5 cards at most. Enter your card number or swipe your card, and then the card information will be read by the Access Controller.</p> <p>You can enable the Duress Card function. An alarm will be triggered if a duress card is used to unlock the door.</p> <p></p> <p>One user can only set one duress card.</p>
Password	Enter the user password. The maximum length of the password is 8 digits. The duress password is the unlock password + 1. For example, if the user password is 12345, the duress password will be 12346. A duress alarm will be triggered when a duress password is used to unlock the door.
User Permission	<ul style="list-style-type: none"> • User: Users only have door access or time attendance permissions. • Admin: Administrators can configure the Access Controller besides door access and attendance permissions.
Period	People can unlock the door or take attendance during the defined period.
Holiday Plan	People can unlock the door or take attendance during the defined holiday.
Validity Period	Set a date on which the door access and attendance permissions of the person will be expired.

Parameter	Description
User Type	<ul style="list-style-type: none"> ● General User: General users can unlock the door. ● Blocklist User: When users on the blocklist unlock the door, a blocklist alarm will be triggered. ● Guest User: Guests can unlock the door within a defined period or for a designated number of times. After the defined period expires or the unlocking times run out, they cannot unlock the door. ● Patrol User: Patrol users can take attendance on the Access Controller, but they do not have door permissions. ● VIP User: When VIP users unlock the door, service personnel will receive a notification. ● Other User: When they unlock the door, the door will stay unlocked for 5 more seconds. <p></p> <p>The delay time is not available for remote verification methods.</p> <ul style="list-style-type: none"> ● Custom User 1/Custom User 2: Same with general users.
Department	<p>Select departments, which is useful when configuring department schedules.</p> <p></p> <p>This function is only available on select models.</p>
Schedule Mode	<ul style="list-style-type: none"> ● Department Schedule: Apply department schedules to the user. ● Personal Schedule: Apply personal schedules to the user. <p></p> <p>◊ This function is only available on select models.</p> <p>◊ If you set the schedule mode to department schedule here, the personal schedule you have configured for the user in Attendance > Schedule Config > Personal Schedule becomes invalid.</p>

Step 3 Press the Esc key, and then press OK to save the configurations.

2.6.2 Viewing User Information

View the user or administrator information. You can edit or delete the user and administrator information.

Procedure

- Step 1** On the **Main Menu**, select **Users**.
- Step 2** Select **User List**, or select **Admin List**.
 - The user list displays all the user information in the Device.
 - The admin list displays all the administrator information in the device.
- Step 3** View all added users or admin accounts.
 - : Unlock through password.
 - : Unlock through swiping card.
 - : Unlock through face recognition.
 - : Unlock through fingerprint.

Figure 2-12 User list

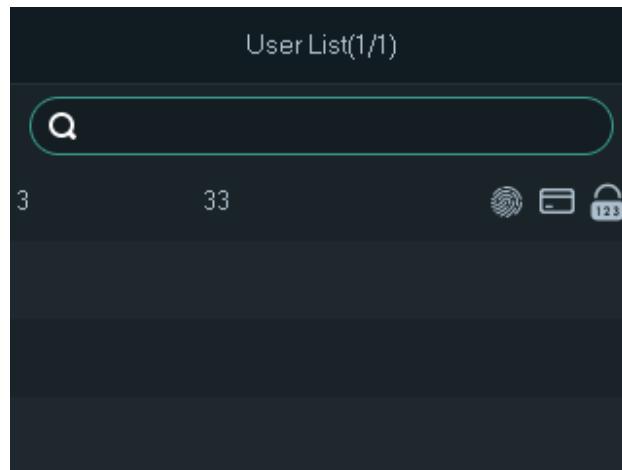

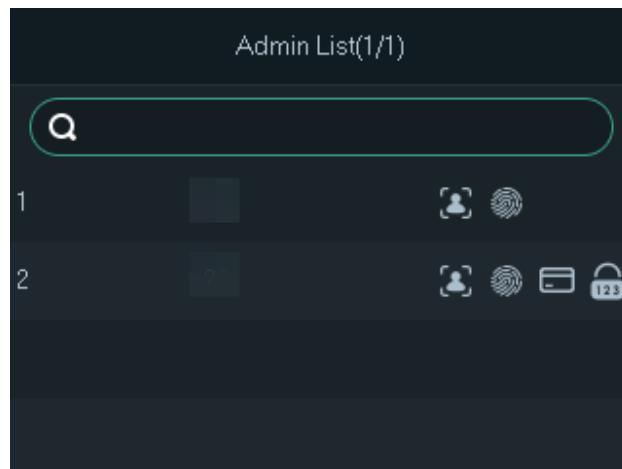

Figure 2-13 Admin list

Related Operations

- Search for users or administrators: Press or to select the search box, enter the user number, user name, administrator number or the administrator name, and then press OK.

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

- Edit users or administrators: Press or to select the user or the administrator, and then press OK.
- Delete users or administrators
 - ◊ Delete one by one:
 1. On the user list or the admin list screen, press or to select the user or the administrator, and then press OK.
 2. Press to select , and then press OK.
 3. Press OK to delete the user.
 - ◊ Delete all the users: On the **Person Management** screen, select **Delete All Users**, press OK, and then press OK again to delete all the users, including the administrators.

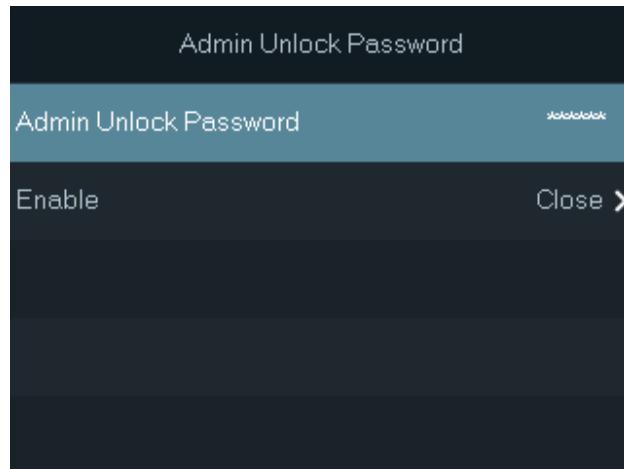

2.6.3 Configuring the Admin Unlock Password

You can unlock the door by only entering the admin password. This password is not limited by user types. Only one admin unlock password is allowed for one device.

Procedure

- Step 1 On the **Main Menu** screen, select **Users > Admin Unlock Password**.
- Step 2 Enter the password, and then press OK.

Figure 2-14 Admin unlock password

- Step 3 Select **Enable**, and then press OK to enable this function.

2.7 Access Control Management

You can configure settings for doors such as the unlocking mode, alarm linkage and door schedules. The available unlock modes might differ depending on the product model.

Figure 2-15 Access control management

2.7.1 Configuring Unlock Combinations

Use card, fingerprint, face, password or their combinations to unlock the door. The available unlock modes might differ depending on the product model.

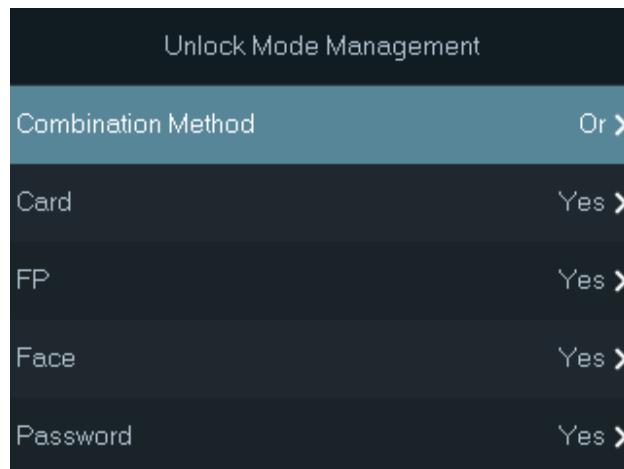

Procedure

- Step 1 On the **Main Menu**, select **Access Control Management > Combination Unlock**.
- Step 2 Press OK to configure the combination method and the verification method.
 - For example, configure the **Combination Method** as **And**, configure **Yes** for card and password. You can unlock the door by recognizing the face and entering the password.
 - For example, configure the **Combination Method** as **Or**, configure **Yes** for card and password. You can unlock the door by recognizing the face or entering the password.

The verification method of the fingerprint is available on the model with the fingerprint function.

Figure 2-16 Combination unlock

- Step 3 Press Esc, and then press OK to save the configurations.

2.7.2 Configuring Alarms

An alarm will be triggered when the entrance or exit is abnormally accessed.

Procedure

- Step 1 On the **Main Menu**, select **Access Control Management > Alarm**.
- Step 2 Configure the alarm parameters.

Figure 2-17 Alarm settings

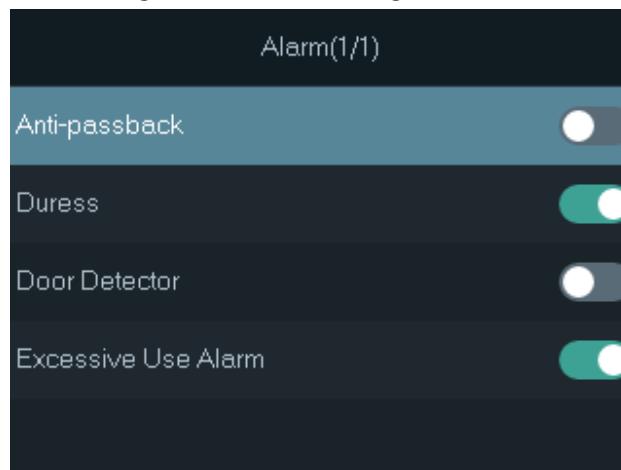

Table 2-4 Description of alarm parameters

Parameter	Description
Anti-passback	<p>Users need to verify their identities both for entry and exit; otherwise an alarm will be triggered. This helps prevent card holders from being able to give their card to other people to allow them access. When anti-passback is enabled, the card holder must leave the secure area through an exit reader before the system will grant them access again.</p> <p>People need to swipe their card at the "in" reader to enter a secure area and swipe it at the "out" reader to get out of it.</p> <ul style="list-style-type: none"> ● If a person enters after being verified, but exits without being verified, an alarm will be triggered if they attempt to enter again, and they will be denied access. ● If a person enters without being verified, an alarm will be triggered if they attempt to exit, and they will be denied access. <p> If the Device can only connect to one lock, verification through the Device means a person entered in the "in" direction, and verification through the external card reader means they exited in the "out" direction. You can modify the configuration on the platform.</p>
Duress	An alarm will be triggered when a duress card, duress password or duress fingerprint is used to unlock the door.
Door Detector	With the door detector wired to your device, alarms can be triggered

+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Parameter	Description
Door Detector Type	<p>when doors are opened or closed abnormally. There are 2 types of door detectors: NC detector and NO detector.</p> <ul style="list-style-type: none"> • Normally Closed: The sensor is in a shorted position when the door or window is closed. • Normally Open: An open circuit is created when the window or door is actually closed.
Excessive Use Alarm	If the wrong password or card is used 5 times in a row within 60 seconds, the alarm for excessive use of illegal card will be triggered and lasts for a defined time.

Step 3 Press Esc, and then press OK to save the configurations.

2.7.3 Configuring the Door Status

Procedure

- Step 1 On the **Main Menu** screen, select **Access Control Management > Lock Status Config**.
Step 2 Configure the parameters.

Figure 2-18 Lock status

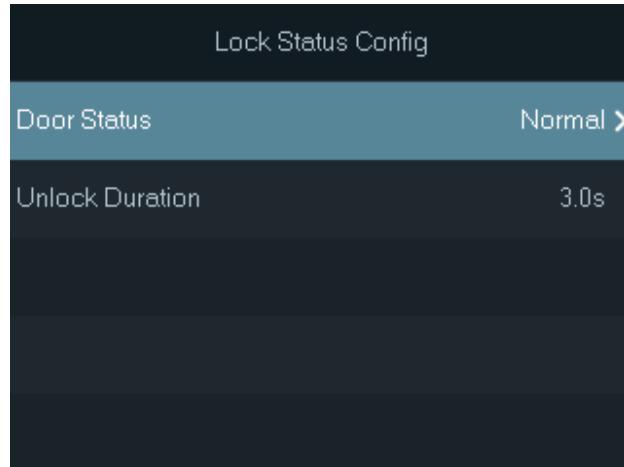

Table 2-5 Parameters description

Parameter	Description
Door Status	<ul style="list-style-type: none"> • Normally Open: The door remains unlocked all the time. • Normally Closed: The door remains locked all the time. • Normal: If Normal is selected, the door will be locked and unlocked according to your settings.
Unlock Duration	After a person is granted access, the door will remain unlocked for a defined time for them to pass through.

2.7.4 Configuring the Verification Time Interval

If you verify your identity multiple times within a set period, only the earliest verification will be considered valid, and the door will not open after the second or later verifications. From the moment

(+91)-11-41916615
 +91-95999-53923

 Phase I, New Delhi, 110020

sales@timewatchindia.com
 www.timewatchindia.com

the door fails to open, you must wait for the configured verification time interval before attempting to verify your identity again.

Procedure

- Step 1 On the **Main Menu** screen, select **Access Control Management > Verification Interval (sec).**
- Step 2 Enter the time interval, select **OK**, and then press **OK**.

2.8 Communication Settings

Configure the network, serial port and Wiegand port to connect the Device to the network.

The serial port and the Wiegand port might differ depending on the models of Device.

2.8.1 Configuring Network

2.8.1.1 Configuring the IP Address

Set an IP address for the Device to connect it to the network. After that, you can log in to the webpage and the management platform to manage the Device.

Procedure

- Step 1 On the **Main Menu**, select **Communication Settings > IP Settings**.
- Step 2 Set the IP Address.

The displayed parameters may differ according to different device models.

Figure 2-19 IP settings

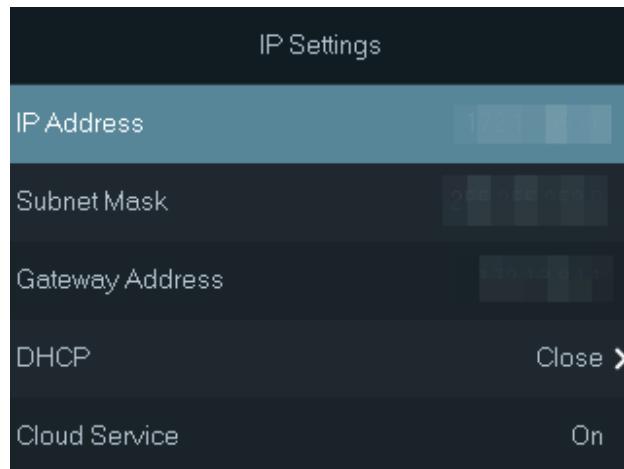

Table 2-6 IP configuration parameters

Parameter	Description
IP Address/Subnet Mask/Gateway Address	Enter the IP address, subnet mask, and gateway IP address. They must be on the same network segment.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Parameter	Description
DHCP	It stands for Dynamic Host Configuration Protocol. When DHCP is turned on, the Device will automatically be assigned the IP address, subnet mask, and gateway.
Cloud Service	If this function is turned on, you can manage devices without applying for DDNS, setting port mapping or deploying transit servers.

2.8.1.2 Configuring Wi-Fi

You can connect the Device to the network through the Wi-Fi network.

Background Information

- This function is only available on select models.
- Wi-Fi AP and Wi-Fi function cannot be enabled at the same time.

Procedure

Step 1 On the **Main Menu**, select **Communication Settings > Wi-Fi**.

Step 2 Select **Search**, and then press OK.

Step 3 Press OK to turn on Wi-Fi.

After Wi-Fi is enabled, wait about 1 minute to connect Wi-Fi.

Step 4 Select a wireless network, and then press OK.

Step 5 Enter the password for the Wi-Fi, select **Connect**, and then press OK.

Step 6 (Optional) If the system does not find a Wi-Fi network, select **SSID** to enter the name of the Wi-Fi.

Result

If the phone and the device connect to the same Wi-Fi, enter the IP address that is displayed on the Wi-Fi screen in the address bar of the browser to access to the device.

Related Operations

DHCP: Turn on this function, and the Device will automatically be assigned a Wi-Fi address. Turn off this function, and you can configure the IP address.

2.8.1.3 Configuring Wi-Fi AP

Enable the Wi-Fi AP function, you can access the Device through the AP.

- This function is only available on select models.
- Wi-Fi AP and Wi-Fi function cannot be enabled at the same time.

Procedure

Step 1 On the **Main Menu**, select **Communication Settings > Wi-Fi AP**.

Step 2 Turn on Wi-Fi AP.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

You can modify the SSID and configure the password through **Security**.

- After the Wi-Fi AP is enabled, wait about 1 minutes to connect it.
- The security is **None** by default.

Figure 2-20 Connect to Wi-Fi AP

Result

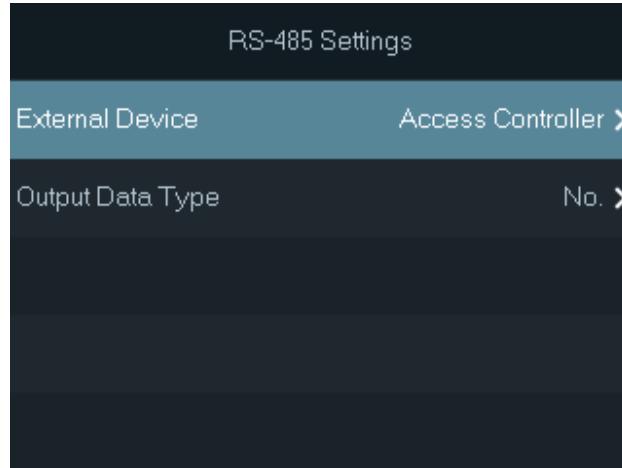

Use your computer to connect to Wi-Fi AP of the Device to access its webpage.

2.8.2 Configuring RS-485

Procedure

- Step 1 On the **Main Menu**, select **Communication Settings > RS-485 Settings**.
- Step 2 Select the external device.

Figure 2-21 External device type

Table 2-7 Parameter description

External device	Description
Access Controller	<p>The Device functions as a card reader and sends data to other external access controllers to control access.</p> <p>Output Data type:</p> <ul style="list-style-type: none"> • Select Card Number. Outputs data based on the card number when users swipe their cards to unlock doors; outputs data based on user's first card number when users use other unlock methods. • Select No.. Outputs data based on the user ID.
Card Reader	The Device connects to an external card reader. The card information is sent to the access controller or the management platform.
Reader (OSDP)	The Device is connected to a card reader based on the OSDP protocol. The card information is sent to the access controller or the management platform.
Door Control Security Module	After the security module is enabled, the door exit button, lock control and fire linkage of the Device become invalid, but the door exit button and lock control that connects to the security module become effective. You can unlock the door (only swiping the card is supported) through the external card reader that is connected to the door control security module.

2.8.3 Configuring Wiegand

The Device allows for both Wiegand input and output mode.

Select the Wiegand type according to the connected device.

- Select **Wiegand Input** when you connect an external card reader to the Device.
- Select **Wiegand Output** when the Device functions as a card reader, and you need to connect it to a controller or another access terminal.

This function is only available on select models.

Procedure

Step 1 On the **Main Menu**, select **Communication Settings > Wiegand Settings**.

Step 2 Select a Wiegand type, and then configure the parameters.

Figure 2-22 Wiegand settings

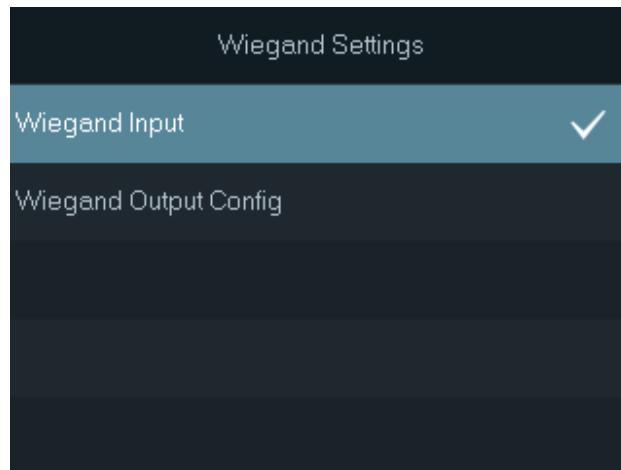

Table 2-8 Description of Wiegand settings

Parameter	Description	
Wiegand Input	Card No. Inversion	When the Device connects to a third-party device through the Wiegand input port, and the card number read by the Device is in the reverse order from the actual card number. In this case, you can turn on Card No. Inversion function.
Wiegand Output Config	Wiegand Output Type	Select a Wiegand format to read card numbers or ID numbers. <ul style="list-style-type: none"> • Wiegand26: Reads 3 bytes or 6 digits. • Wiegand34: Reads 4 bytes or 8 digits. • Wiegand66: Reads 8 bytes or 16 digits.
	Pulse Width	Enter the pulse width and pulse interval of Wiegand output.
	Pulse Interval	
	Output Data Type	Select the type of output data. <ul style="list-style-type: none"> • No.: The system outputs data based on the user ID. The data format is hexadecimal or decimal. • Card Number: The system outputs data based on user's first card number.
	Output Format	When the Output Data Type is configured as No. , you can select Hexadecimal or Decimal as the output format.

2.9 System Settings

Figure 2-23 System settings

2.9.1 Configuring Time

Configure system time, such as date and time.

Procedure

- Step 1 On the **Main Menu**, select **System > Time**.
- Step 2 Configure the time parameters.

Figure 2-24 Time settings

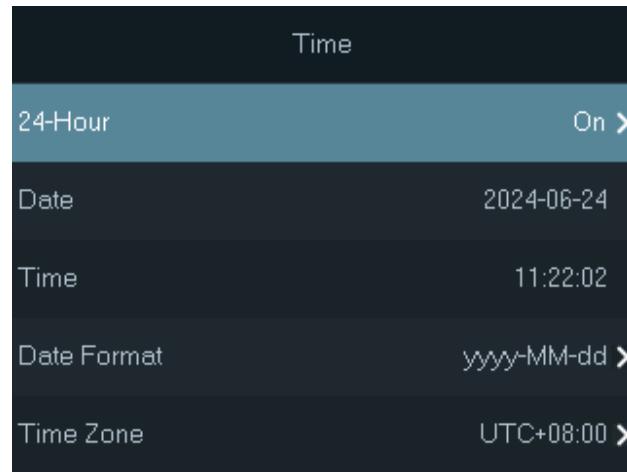

Table 2-9 Description of time parameters

Parameter	Description
24-Hour	Press < , > or OK to turn on or turn off the 24-hour format. Turn on it, the time is displayed in the 24-hour format. Turn off it, the time is displayed in the 12-hour format.
Date & Time	<ol style="list-style-type: none"> 1. Press ▲ or ▼ to select Date&Time, and then press OK. 2. Press the number button to enter the date, and then press Esc.

Parameter	Description
Time	1. Press or to select Time , and then press OK. 2. Press the number button to enter the time, and then press Esc.
Date Format	1. Press or to select Date Format . 2. Press , or OK to select the date format.
Time Zone	1. Press or to select Time Zone . 2. Press , or OK to select the time zone.

2.9.2 Configuring Face Parameters

Configure the face parameters to change the accuracy of reorganization and improve the protection ability of the access control.

Background Information

We recommend that this function be used by professional person for debugging.

Procedure

Step 1 On the **Main Menu**, select **System > Face Parameters**.

Step 2 Configure the face parameters.

Figure 2-25 Face parameters

Table 2-10 Description of face parameters

Name	Description
Face Recognition Threshold	<p>Adjust the accuracy level of face recognition. Higher threshold means higher accuracy and lower false recognition rate.</p> <p></p> <p>When the threshold is too low such as 0, the false recognition rate will be extremely high. Please be advised.</p>

sales@timewatchindia.com
 www.timewatchindia.com

2.9.4 Configuring the Language

Change the language on the Device. On the **Main Menu**, select **System > Language**, select the language for the Device.

2.9.5 Configuring Screen Parameters

Configure when the display should turn off and the logout time.

Procedure

- Step 1 On the **Main Menu**, select **System > Screen Settings**.
- Step 2 Configure the parameters.

Figure 2-27 Screen settings

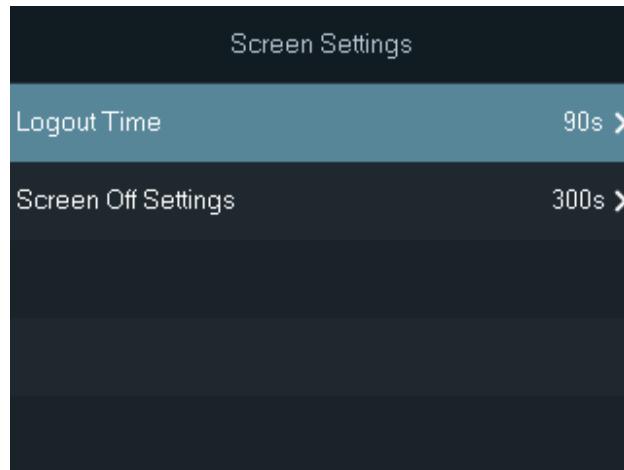

Table 2-12 Parameters description

Parameters	Description
Logout Time	The system goes back to the standby screen after a defined time of inactivity.
Screen Off Settings	The system goes back to the standby screen and then the screen turns off after a defined time of inactivity.

Example

For example, if the logout time is set to 15 seconds, and the screen off time is set to 30 seconds, the system goes back to the standby screen after 15 seconds, and then the screen will turn off after another 15 seconds.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

The logout time must be less than the screen off time.

2.9.6 Restoring Factory Defaults

Background Information

Restoring factory defaults will cause data loss. Please be advised.

Procedure

- Step 1 On the **Main Menu**, select **System > Factory Defaults**.
- Step 2 Restore factory defaults if necessary. Restore the factory default settings if necessary.
 - **Factory Defaults:** Resets all configurations and data except for IP settings and the type of the extension module.
 - **Restore to Default Settings (except for user information and logs):** Resets all the configurations except for user information and logs.

2.9.7 Restarting the Device

On the **Main Menu**, select **System > Restart**, press OK, and then press OK for the prompt. The Device will be restarted.

2.10 USB Management

You can use a USB to update the Device, and export or import user information or attendance records through USB.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

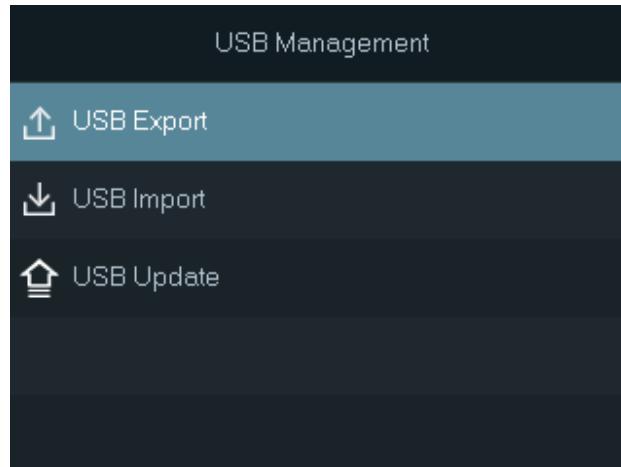

sales@timewatchindia.com
www.timewatchindia.com

- Make sure that a USB is inserted to the Device before you export data or update the system. To avoid failure, do not pull out the USB or perform any operation of the Device during the process.
- You can use a USB to export the information from a Device to another Device. Face images are not allowed to be imported through USB.

Figure 2-28 USB management

2.10.1 Exporting to USB

You can export data from the Device to a USB. The exported data is encrypted and cannot be edited.

Procedure

Step 1 On the **Main Menu**, select **USB Management > USB Export**.

Step 2 Select the data type you want to export.

- When the data is exported in Excel, it can be edited.
- The USB disk supports the format in FAT32, and the storage capacity is 4 GB – 128 GB. Personnel information, facial features, card data, fingerprint data are encrypted when exporting.

Step 3 Press OK to confirm.

The exported data is saved to the USB.

2.10.2 Importing from USB

You can import data from USB to the Device.

Procedure

Step 1 On the **Main Menu**, select **USB Management > USB Import**.

Step 2 Select the data type that you want to import, and then press **OK**.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

We recommend you import the data to the device with the same model and version. Data transmission between devices with different models and versions will cause data loss.

2.10.3 Updating the System

Update the system of the Device through USB.

If you start the Device for the first time or restore the Device to factory default settings, the Device automatically backups the system files within the first 10 minutes. Please do not update in this period.

Procedure

Step 1 Rename the update file to "update.bin", put it in the root directory of the USB, and then insert the USB to the Device.

Step 2 On the **Main Menu**, select **USB Management > USB Update**.

Step 3 Press **OK**.

The Device will restart when the updating completes.

Do not power off the Device during the update.

2.11 Record Management

On the main menu, select **Records > Search for Unlock Records**. The unlock records are displayed. You can search for record by user ID.

Figure 2-29 Unlock records

Unlock Records(1/2)		
No.	Time	Results
3	06-24 11:24	Succeed

2.12 System Information

sales@timewatchindia.com
www.timewatchindia.com

2.12.1 Viewing Data Capacity

On the **Main Menu**, select **Info > Data Capacity**, you can view storage capacity of each data type.

2.12.2 Viewing Device Version

On the **Main Menu**, select **Info > Device Version**, you can view the device version, such as serial No., software version and more.

Related Operations

Select **Product Material QR Code**, press OK, and then scan the QR code with your phone to view the product documents.

This function is only available on select models.

3 Webpage Operations

On the webpage, you can also configure and update the Device.

Web configurations differ depending on models of the Device.

3.1 Initialization

Initialize the Device when you log in to the webpage for the first time or after the Device is restored to the factory defaults.

Prerequisites

Make sure that the computer used to log in to the webpage is on the same LAN as the Device.

Procedure

Step 1 Open a browser, go to the IP address (the default address is 192.168.1.108) of the Device.

We recommend you use the latest version of Chrome or Firefox.

Step 2 Select a language on Device.

Step 3 Set the password and email address according to the screen instructions.

- The password must consist of 8 to 32 non-blank characters and contain at least two types of the following characters: upper case, lower case, numbers, and special characters (excluding ' " ; : &). Set a high-security password by following the password strength prompt.
- Keep the password safe after initialization and change the password regularly to improve security.

3.2 Resetting the Password

Reset the password through the linked e-mail when you forget the admin password.

Procedure

Step 1 On the login page, click **Forgot password**.

Step 2 Read the on-screen prompt carefully, and then click **OK**.

Step 3 Scan the QR code, and you will receive a security code.

Table 3-3 Parameters description

Parameter	Description
User ID	The User ID is like employee ID, which can be numbers, letters, and their combinations, and the maximum length of the number is 30 characters.
Name	The name can have up to 32 characters (including numbers, symbols, and letters).
Department	Add users to a department. If a department schedule is assigned to the person, they will follow the established department schedule. <ul style="list-style-type: none"> • Department Schedule: Assign department schedule to the user. • Personal Schedule: Assign personal schedule to the user.  <ul style="list-style-type: none"> ◊ This function is only available on select models. ◊ If you set the schedule mode to department schedule here, the personal schedule you have configured for the user in Attendance > Schedule Config > Personal Schedule is invalid.
Schedule Mode	
Validity Period	Set a date on which the door access and attendance permissions of the person will be expired.
Permission	<ul style="list-style-type: none"> • User: Users only have door access or time attendance permissions. • Admin: Administrators can configure the Device besides door access and attendance permissions.
User Type	<ul style="list-style-type: none"> • General User: General users can unlock the door. • Blocklist User: When users in the blocklist unlock the door, service personnel will receive a notification. • Guest User: Guests can unlock the door within a defined period or for certain amount of times. After the defined period expires or the unlocking times runs out, they cannot unlock the door. • Patrol User: Patrol users can take attendance on the Device, but they do not have door permissions. • VIP User: When VIP unlock the door, service personnel will receive a notice. • Other User: When they unlock the door, the door will stay unlocked for 5 more seconds. • Custom User 1/Custom User 2: Same with general users.
Time Used	Set an unlock limit for guest users. After the unlock times run out, they cannot unlock the door.

Parameter	Description
Period	<p>People can unlock the door or take attendance during the defined period.</p> <p></p> <p>You can select more than one period.</p>
Holiday Plan	<p>People can unlock the door or take attendance during the defined holiday.</p> <p></p> <p>You can select more than one holiday.</p>
Face	<p>Click Upload to upload a face image. Each person can only add up to 2 face images. You can view or delete the face image after you upload it.</p> <p></p> <p>The face image is in jpg, jpeg, png format and must be less than 100 KB.</p>

Parameter	Description
Unlock Notification	<p>Displays the notification on the screen when a person verifying their identity on the Device.</p> <ul style="list-style-type: none"> High Speed Mode: The system prompts Successfully verified or Not authorized on the screen. Simple Mode: Displays user ID, name and verification time after access granted; displays Not authorized and authorization time after access denied. Standard: Displays user's registered face image, user ID, name and verification time after access granted; displays Not authorized and verification time after access denied. Contrast Mode: Displays the captured face image and a registered face image of a user, user ID, name and authorization time after access granted; displays Not authorized and authorization time after access denied.
Verification Interval	If you verify your identity multiple times within a set period, only the earliest verification will be considered valid, and the door will not open after the second or later verifications. From the moment the door fails to open, you must wait for the configured verification time interval before attempting to verify your identity again.

Step 3 Click **Apply**.

3.5.2.2 Configuring Unlock Methods

You can use multiple unlock methods to unlock the door, such as fingerprint, card, and password. You can also combine them to create your own personal unlock method.

Procedure

Step 1 Select **Access Control > Access Control Parameters**.

Step 2 In **Unlock Settings**, select an unlock mode.

- Combination unlock
 - Select **Combination Unlock** from the **Unlock Mode** list.
 - Select **Or** or **And**.
 - Or: Use one of the selected unlock methods to open the door.
 - And: Use all the selected unlock methods to open the door.
 - Select unlock methods, and then configure other parameters.

Figure 3-7 Unlock by period

- Unlock by multiple users.
 1. In the **Unlock Mode** list, select **Unlock by multiple users**.
 2. Click **Add** to add groups.
 3. Select unlock method, valid number and user list.
 - ◊ If only one group is added, the door unlocks only after the number of people in the group who grant access equals the defined valid number.
 - ◊ If more than one groups are added, the door unlocks only after the number of people in each group who grant access equals the defined valid number.

- ◊ You can add up to 4 groups.
- ◊ The valid number indicates the number of people in each group who need to verify their identities on the Device before the door unlocks. For example, if the valid number is set to 3 for a group, any 3 people in the group need to verify their identities to unlock the door.

Step 3 Click **Apply**.

3.5.3 Configuring Alarms

An alarm will be triggered when an abnormal access event occurs.

Procedure

- Step 1 Select **Access Control > Alarm > Alarm**.
- Step 2 Configure alarm parameters.

www.timewatchindia.com

Figure 3-10 Face detection parameters

Step 3 Configure the parameters.

Table 3-8 Description of face parameters

Name	Description
Face Recognition Threshold	Adjust the accuracy level of face recognition. Higher threshold means higher accuracy and lower false recognition rate. When the threshold is too low such as 0, the false recognition rate will be extremely high. Please be advised.
Max Face Recognition Angle Deviation	Set the largest angle that a face can be posed in for face detection. The larger the value, the larger the range for the face angle. If the angle a face is positioned in is not within the defined range, it might not be detected properly.
Anti-spoofing Level	This prevents people from being able to use photos, videos, mask and other substitutes to gain unauthorized access.
Valid Face Interval (sec)	When the same face remains in front of the lens after the first successful recognition, the Device will perform recognition again for the face after a defined interval.
Invalid Face Interval (sec)	When the same face remains in front of the lens after the first failed recognition, the Device will perform recognition again for the face after a defined interval.
Recognition Distance	The distance between the face and the lens.
Smart Screen Light Up	When enabled, in the screen-off status, the screen will light up when a face is detected.

Step 4 Configure the exposure parameters.

Step 4 Click **Apply**.

3.5.7 Configuring Schedules

Configure time sections and holiday plans, and then you can define when a user has the permissions to unlock doors.

3.5.7.1 Configuring Time Periods

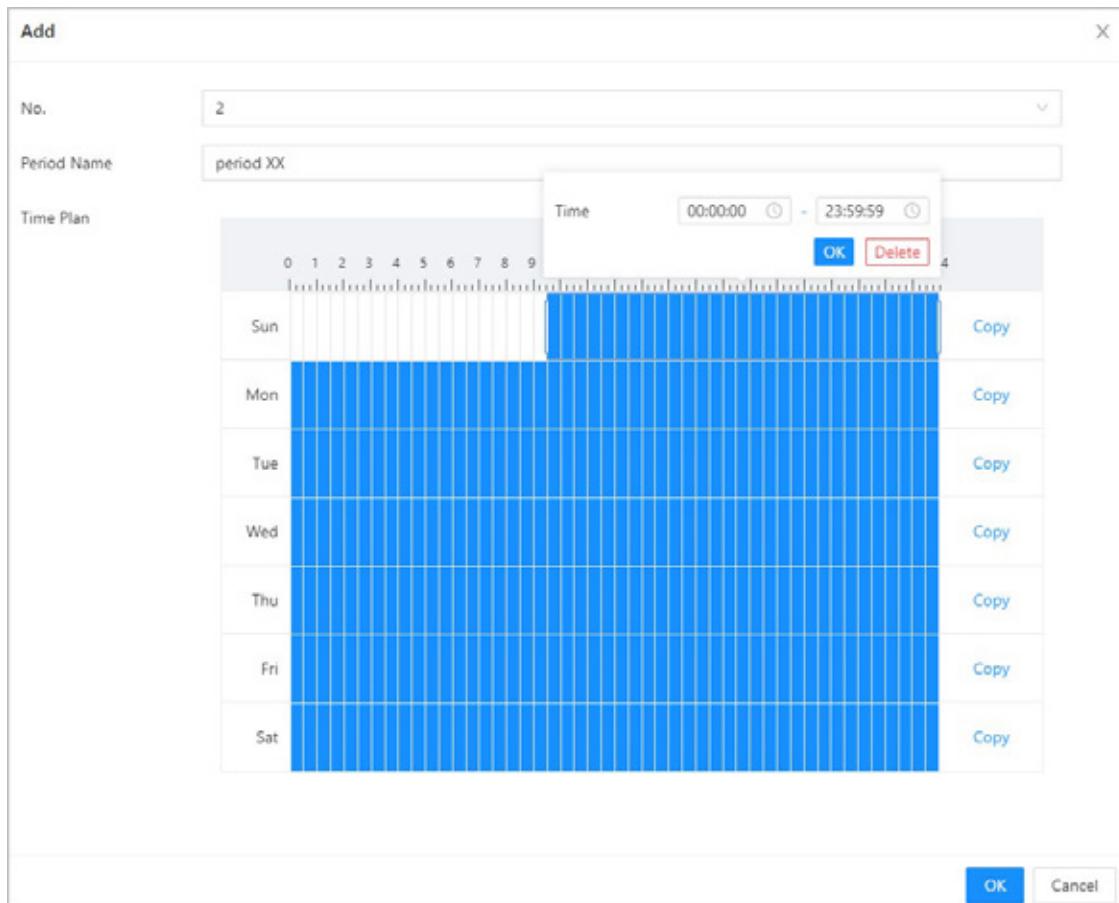

You can configure up to 128 periods (from No.0 through No.127) of time periods. In each period, you need to configure door access schedules for a whole week. People can only unlock the door during the scheduled time.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Access Control > Period Config > Period**.
- Step 3 Click **Add**.

Figure 3-13 Configure time periods

- Step 4 Drag the time slider to configure time for each day.
- Step 5 (Optional) Click **Copy** to copy the configuration to the rest of days.
- Step 6 Click **OK**.

3.5.7.2 Configuring Holiday Plans

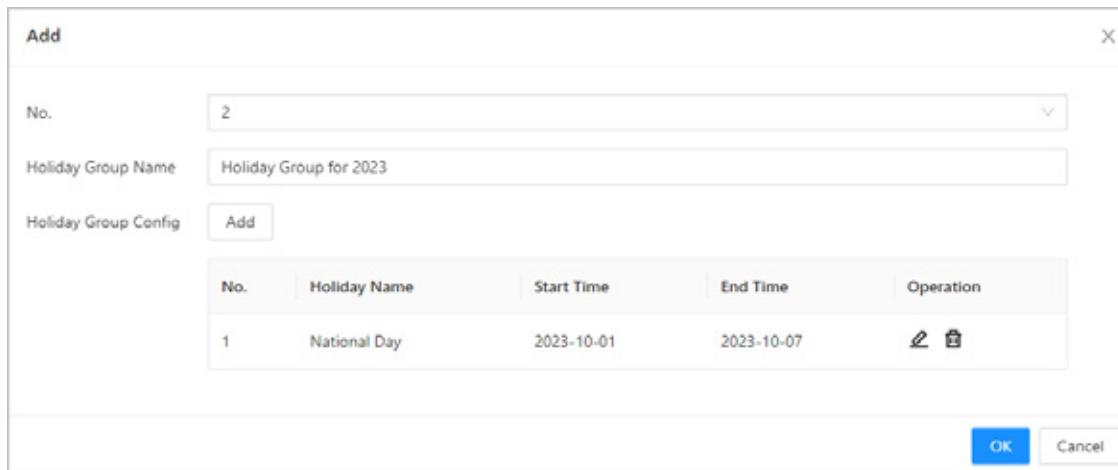

You can configure up to 128 holiday groups (from No.0 through No.127), and for each holiday group, you can add up to 16 holidays in it. After that, you can assign the configured holiday groups to the holiday plan. Users can only unlock the door during the defined time of the holiday plan.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Access Control > Period Config > Holiday Plan**.
- Step 3 Click **Holiday Management**, and then click **Add**.
- Step 4 Select a number for the holiday group, and then enter a name for the group.

3.6.2 Configuring Shifts

Configure shifts to define time attendance rules. Employees need to work at the time scheduled for their shift to start, and leave at the end time, except when they choose to work overtime.

Procedure

Step 1 Select **Attendance Config > Shift Config**.

Step 2 Click  to configure the shift.

Figure 3-20 Create shifts

Edit Shift

* Shift No.	1	X
* Shift Name		
* Period 1	08:00:00	→ 17:00:00
* Period 2	00:00:00	→ 00:00:00
* Overtime Period	00:00:00	→ 00:00:00
* Limit for Arriving Late	5	min (0-99)
* Limit for Leaving Early	5	min (0-99)
		OK Cancel

Table 3-11 Shift parameters description

Parameter	Description
Shift Name	Enter the name of the shift.
Period 1	Specify a time range when people can clock in and clock out for the workday.
Period 2	If you only set one attendance period, employees need to clock in and out by the designated times to avoid an anomaly appearing on their attendance record. For example, if you set 08:00 to 17:00, employees must clock in by 08:00 and clock out from 17:00 onwards. If you set 2 attendance periods, the 2 periods cannot overlap. Employees need to clock in and clock out for both periods.
Overtime Period	Employees who clock in or out during the defined period will be considered as working beyond their normal work hours.
Limit for Arriving Late (min)	A certain amount of time can be granted to employees to allow them to clock in a bit late and clock out a bit early. For example, if the regular time to clock in is 08:00, the tolerance period can be set as 5 minutes for employees who arrive by 08:05 to not be considered as late.
Limit for Leaving Early (min)	

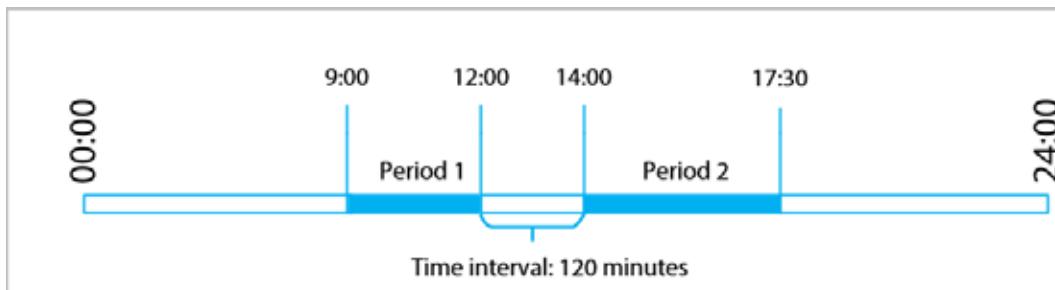

- When the time interval between 2 periods is an even number, you can divide the time interval by 2, and assign the first half of the interval to the first period, which will be the clock out time. The second half of the interval should be assigned to the second period as the clock in time.

 (+91)-11-41916615
 +91-95999-53923

 D-162, Okhla Industrial Area
 Phase I, New Delhi, 110020

 sales@timewatchindia.com
 www.timewatchindia.com

Figure 3-21 Time interval (even number)

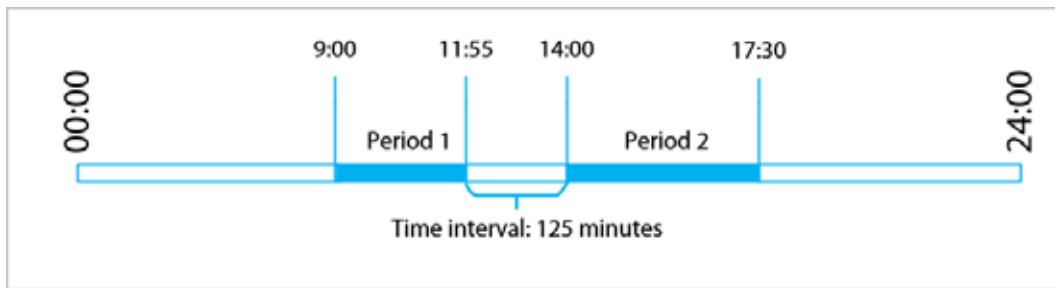

For example: If the interval is 120 minutes, then the clock-out time for period 1 is from 12:00 to 12:59, and the clock-in time for period 2 is from 13:00 to 14:00.

If a person clocks out multiple times during period 1, the latest time will be valid, and if they clock in multiple times during period 2, the earliest time will be valid.

- When the time interval between 2 periods is an odd number, the smallest portion of the interval will be assigned to the first period, which will be the clock out time. The largest portion of the interval will be assigned to the second period as the clock in time.

Figure 3-22 Time interval (even number)

For example: If the interval is 125 minutes, then the clock-out time for period 1 is from 11:55 to 12:57, and the clock-in time for period 2 is from 12:58 to 14:00. Period 1 has 62 minutes, and period 2 has 63 minutes.

If a person clocks out multiple times during period 1, the latest time will be valid, and if they clock in multiple times during period 2, the earliest time will be valid.

All attendance times are precise down to the second. For example, if the normal clock-in time is set to 8:05 AM, the employee who clocks in at 8:05:59 AM will not be considered as arriving late. But, the employee that arrives at 8:06 AM will be marked as late by 1 minute.

Step 3 Click **OK**.

Related Operations

You can click **Default** to restore shifts to factory defaults.

3.6.3 Configuring Holiday

Configure holiday plans to set periods for attendance to not be tracked.

Procedure

- Step 1 Select **Attendance Config > Shift Config > Holiday**.
- Step 2 Click **Add** to add holiday plans.
- Step 3 Configure the parameters.

Figure 3-23 Create holiday plans

The screenshot shows a modal dialog titled "Add Attendance Holiday". It contains three input fields: "Attendance Holiday ..." dropdown set to "1", "Attendance Holiday" text input set to "Attendance Holiday for October", and a date range selector showing "2023-10-01" to "2023-10-07". At the bottom are "OK" and "Cancel" buttons.

Table 3-12 Parameters description

Parameter	Description
Attendance Holiday No.	The number of the holiday.
Attendance Holiday	The name of the holiday.
Start Time	The start and end time of the holiday.
End Time	

- Step 4 Click **OK**.

3.6.4 Configuring Work Schedules

A work schedule generally refers to the days per month and the hours per day that an employee is expected to be at their job. You can create different types of work schedules based on different individuals or departments, and then employees must follow the established work schedules.

Background Information

Refer to the flowchart to configure personal schedules or department schedules.

Table 3-17 Image description

Parameter	Description
Brightness	The brightness of the image. Higher value means brighter images.
Contrast	Contrast is the difference in the luminance or color that makes an object distinguishable. The larger the contrast value is, the greater the color contrast will be.
Hue	Refers to the strength or saturation of a color. It describes the color intensity, or how pure it is.
Saturation	Color saturation indicates the intensity of color in an image. As the saturation increases, the appear stronger, for example being more red or more blue. The saturation value does not change image brightness.
Gamma	Change the image brightness and contrast in a non-linear way. The higher the value, the brighter the image.

3.7.2 Configuring Audio

Set the speaker volume and audio prompts during identity verification.

Procedure

Step 1 Select **Audio and Video Config > Audio**.

Step 2 Configure the audio parameters.

Figure 3-32 Configure audio parameters

Parameter	Description
Mode	<ul style="list-style-type: none"> • Static: Manually enter IP address, subnet mask, and gateway. • DHCP: It stands for Dynamic Host Configuration Protocol. When DHCP is turned on, the Device will automatically be assigned with IP address, subnet mask, and gateway.
MAC Address	MAC address of the Device.
IP Version	IPv4 or IPv6.
IP Address	If you set the mode to Static , configure the IP address, subnet mask and gateway.
Subnet Mask	

Parameter	Description
Default Gateway	 <ul style="list-style-type: none"> IPv6 address is represented in hexadecimal. IPv6 version do not require setting subnet masks. The IP address and default gateway must be in the same network segment.
Preferred DNS	Set IP address of the preferred DNS server.
Alternate DNS	Set IP address of the alternate DNS server.
MTU	<p>MTU (Maximum Transmission Unit) refers to the maximum size of data that can be transmitted in a single network packet in computer networks. A larger MTU value can improve network transmission efficiency by reducing the number of packets and associated network overhead. If a device along the network path is unable to handle packets of a specific size, it can result in packet fragmentation or transmission errors. In Ethernet networks, the common MTU value is 1500 bytes. However, in certain cases such as using PPPoE or VPN, smaller MTU values may be required to accommodate the requirements of specific network protocols or services. The following are recommended MTU values for reference:</p> <ul style="list-style-type: none"> 1500: Maximum value for Ethernet packets, also the default value. This is a typical setting for network connections without PPPoE and VPN, some routers, network adapters, and switches. 1492: Optimal value for PPPoE 1468: Optimal value for DHCP. 1450: Optimal value for VPN.

Step 3 Click **OK**.

3.8.1.2 Configuring Wi-Fi

- The Wi-Fi function is available on select models.
- The Wi-Fi and Wi-Fi AP cannot be enabled at the same time.

Procedure

Step 1 Select **Communication Settings > Network Setting > Wi-Fi**.

Step 2 Turn on Wi-Fi.

Person information can only be pushed to one management platform and unlock records can be pushed to multiple management platforms.

Step 5 Click **Apply**.

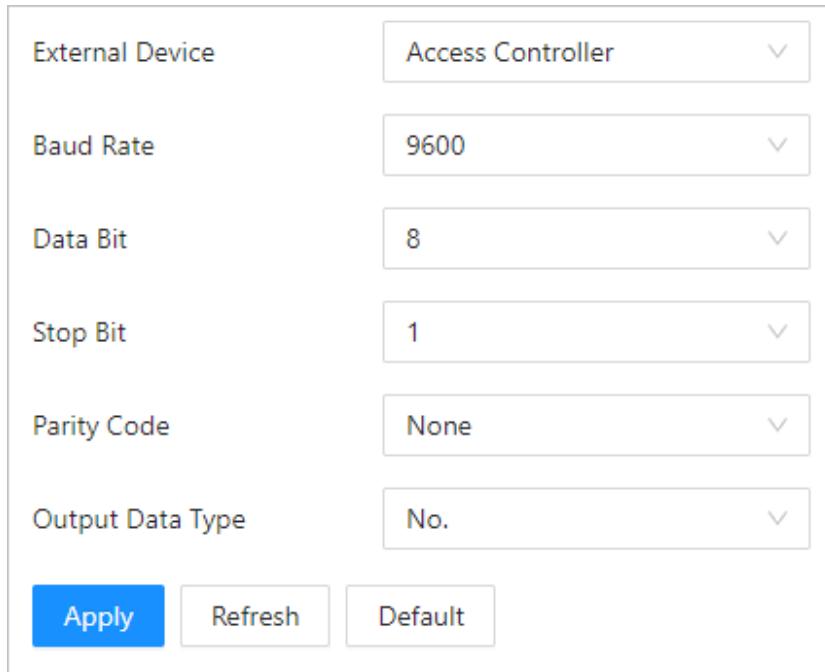

3.8.2 Configuring RS-485

Configure the RS-485 parameters if you connect an external device to the RS-485 port.

Procedure

- Step 1 Select **Communication Settings > RS-485 Settings**.
- Step 2 Configure the parameters.

Figure 3-41 Configure parameters

External Device	Access Controller
Baud Rate	9600
Data Bit	8
Stop Bit	1
Parity Code	None
Output Data Type	No.
<input type="button" value="Apply"/> <input type="button" value="Refresh"/> <input type="button" value="Default"/>	

Table 3-25 Description of RS-485 parameters

Parameter	Description
External Device	<ul style="list-style-type: none"> Access Controller Select Access Controller when the Device functions as a card reader, and sends data to other external access controllers to control access. Card Reader: The Device functions as an access controller, and connects to an external card reader. Reader (OSDP): The Device is connected to a card reader based on OSDP protocol. Door Control Security: The door exit button, lock and fire linkage is not effective after the security module is enabled.
Baud Rate	Select the baud rate. It is 9600 by default.
Data Bit	The number of bits used to transmit the actual data in a serial communication. It represents the binary digits that carry the information being transmitted.
Stop Bit	A bit sent after the data and optional parity bits to indicate the end of a data transmission. It allows the receiver to prepare for the next byte of data and provides synchronization in the communication protocol.
Parity Code	An additional bit sent after the data bits to detect transmission errors. It helps verify the integrity of the transmitted data by ensuring a specific number of logical high or low bits.
Output Data Type	When you configure the external device as Access Controller . <ul style="list-style-type: none"> Card Number: Outputs data based on card number when users swipe card to unlock door; outputs data based on user's first card number when they use other unlock methods. No.: Outputs data based on the user ID.

Step 3 Click **Apply**.

3.8.3 Configuring Wiegand

Supports access Wiegand devices. Configure the mode and the transmission mode according to your actual devices.

Procedure

- Step 1 Select **Communication Settings > Wiegand**.
- Step 2 Select a Wiegand type, and then configure parameters.
 - Select **Wiegand Input** when you connect an external card reader to the Device.

When the Device connects to a third-party device through the Wiegand input port, and the card number read by the Device is in the reverse order from the actual card number. In this case, you can turn on **Card No. Inversion** function.

- Select **Wiegand Output** when the Device functions as a card reader, and you need to connect it to another access controller.

3.9 Configuring the System

3.9.1 User Management

You can add or delete users, change users' passwords, and enter an email address for resetting the password when you forget your password.

3.9.1.1 Adding Administrators

You can add new administrator accounts, and then they can log in to the webpage of the Device.

Procedure

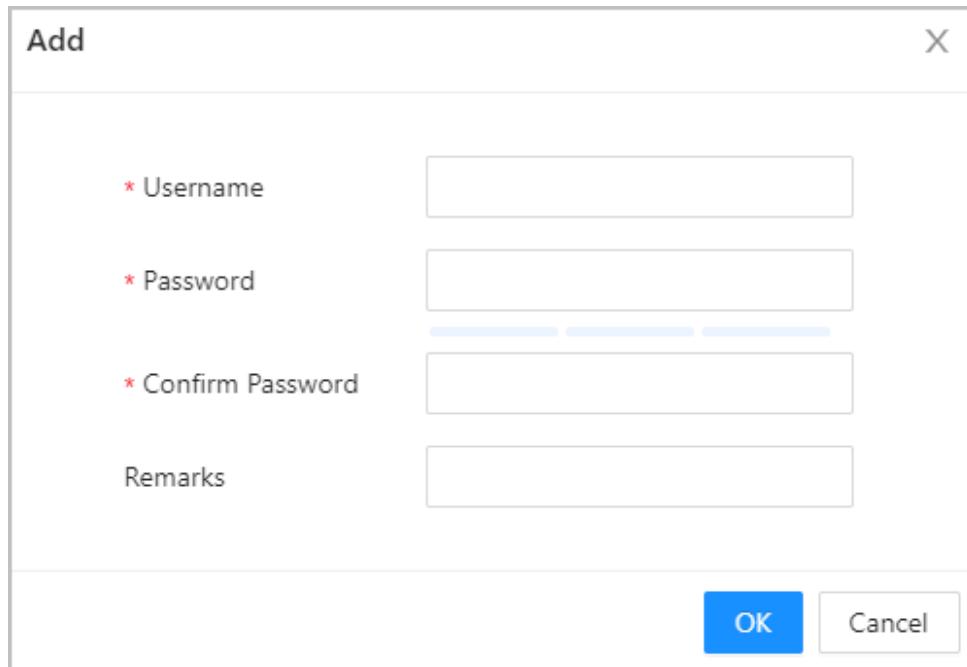

Step 1 On the home page, select **System > Account**.

Step 2 Click **Add**, and enter the user information.

- The username cannot be the same with existing account. The username consists of up to 31 characters and only allows for numbers, letters, underscores, midlines, dots, or @.
 - The password must consist of 8 to 32 non-blank characters and contain at least two types of the following characters: Upper case, lower case, numbers, and special characters (excluding ' " ;: &).
- Set a high-security password by following the password strength prompt.

Figure 3-43 Add administrators

The screenshot shows a modal dialog box titled 'Add'. It has four input fields: 'Username' (marked with a red asterisk), 'Password' (marked with a red asterisk), 'Confirm Password' (marked with a red asterisk), and 'Remarks'. Below the fields is a progress bar. At the bottom right are 'OK' and 'Cancel' buttons.

Step 3 Click **OK**.

Only admin account can change password and admin account cannot be deleted.

3.9.1.2 Adding ONVIF Users

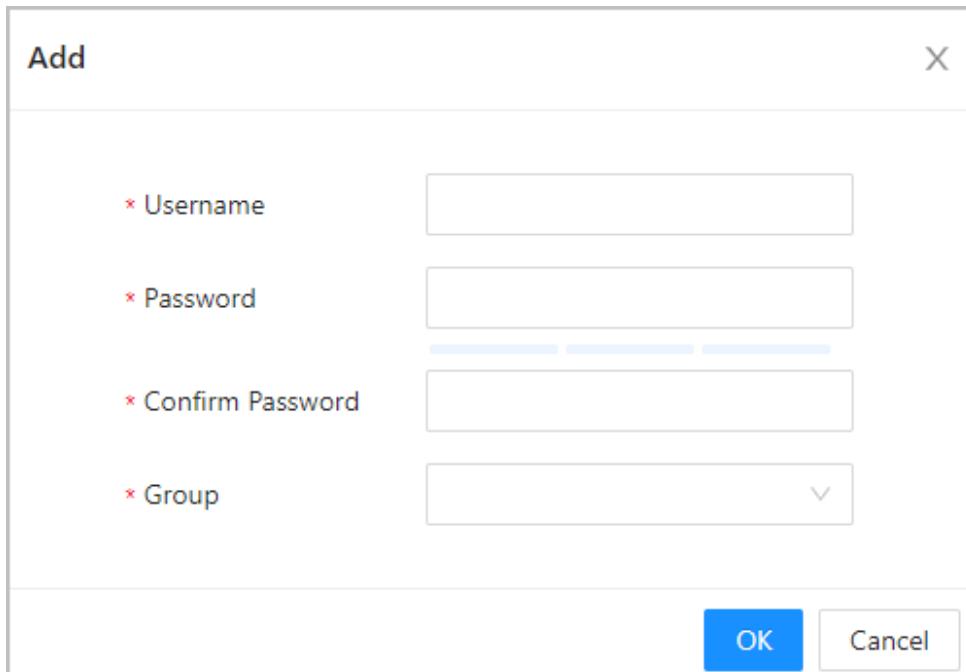

Background Information

Open Network Video Interface Forum (ONVIF), a global and open industry forum that is established for the development of a global open standard for the interface of physical IP-based security products, which allows the compatibility from different manufactures. ONVIF users have their identities verified through ONVIF protocol. The default ONVIF user is admin.

Procedure

- Step 1 On the home page, select **System > Account > ONVIF User**.
- Step 2 Click **Add**, and then configure parameters.

Figure 3-44 Add ONVIF user

The screenshot shows a modal dialog box titled "Add". It contains four input fields with red asterisks indicating required fields: "Username", "Password", "Confirm Password", and "Group". Below the fields is a dropdown menu. At the bottom right are "OK" and "Cancel" buttons.

Table 3-27 ONVIF user description

Parameter	Description
Username	The username cannot be the same with existing account. The username consists of up to 31 characters and only allows for numbers, letters, underscores, midlines, dots, or @.
Password	The password must consist of 8 to 32 non-blank characters and contain at least two types of the following characters: Upper case, lower case, numbers, and special characters (excluding '"';':&).

Group	<p>There are three permission groups which represent different permission levels.</p> <ul style="list-style-type: none"> • admin: You can view and manage other user accounts on the ONVIF Device Manager. • Operator: You cannot view or manage other user accounts on the ONVIF Device Manager. • User: You cannot view or manage other user accounts and system logs on the ONVIF Device Manager.

Step 3 Click **OK**.

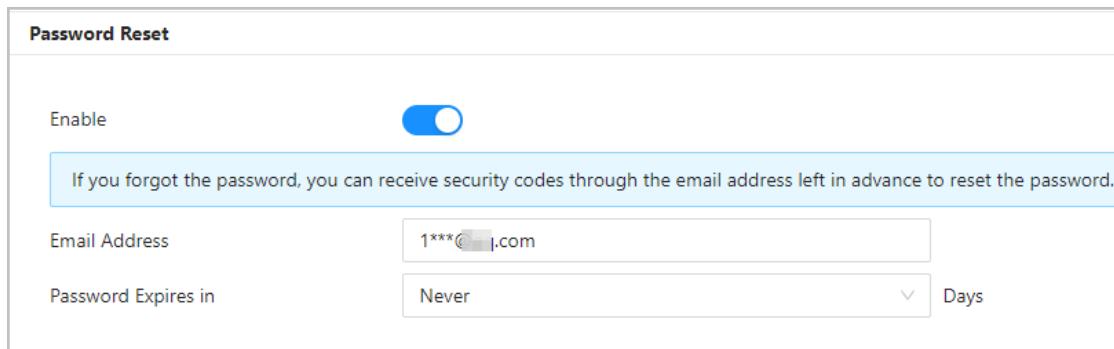

3.9.1.3 Resetting the Password

Reset the password through the linked e-mail when you forget your password.

Procedure

- Step 1 Select **System > Account**.
- Step 2 Enter the email address, and set the password expiration time.
- Step 3 Turn on the password reset function.

Figure 3-45 Reset Password

If you forgot the password, you can receive security codes through the linked email address to reset the password.

Step 4 Click **Apply**.

3.9.1.4 Viewing Online Users

You can view online users who currently log in to the webpage. On the home page, select **System > Online User**.

3.9.2 Configuring Time

Procedure

- Step 1 On the home page, select **System > Time**.
- Step 2 Configure the time of the Platform.

3.10.2 System Information

3.10.2.1 Viewing Version Information

On the webpage, select **Maintenance Center > System Info > Version**, and you can view version information of the Device.

3.10.2.2 Viewing Legal Information

On the home page, select **Maintenance Center > System Info > Legal Info**, and you can view the software license agreement, privacy policy and open source software notice.

3.10.3 Data Capacity

You can see how many users, cards and face images that the Device can store.
Log in to the webpage and select **Maintenance Center>Data Capacity**.

3.10.4 Viewing Logs

View logs such as system logs, admin logs, and unlock records.

3.10.4.1 System Logs

View and search for system logs.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Log > Log**.
- Step 3 Select the time range and the log type, and then click **Search**.

Related Operations

- click **Export** to export the searched logs to your local computer.

www.timewatchindia.com

- Click **Encrypt Log Backup**, and then enter a password. The exported file can be opened only after entering the password.
- Click  to view details of a log.

3.10.4.2 Unlock Records

Search for unlock records and export them.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Log > Unlock Records**.
- Step 3 Select the time range and the type, and then click **Search**.
You can click **Export** to download the log.

3.10.4.3 Alarm Logs

View alarm logs.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Log > Alarm Logs**.
- Step 3 Select the type and the time range.
- Step 4 Enter the admin ID, and then click **Search**.

3.10.4.4 Admin Logs

Search for admin logs by using admin ID.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Log > Admin Logs**.
- Step 3 Enter the admin ID, and then click **Search**.
Click **Export** to export admin logs.

3.10.4.5 USB Management

Export user information from/to USB.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Log > USB Management**.

(+91)-11-41916615
+91-95999-53923

Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

- Make sure that a USB is inserted to the Device before you export data or update the system. To avoid failure, do not pull out the USB or perform any operation of the Device during the process.
- You have to use a USB to export the information from the Device to other devices. Face images are not allowed to be imported through USB.

Step 3 Select a data type, and then click **USB Import** or **USB Export** to import or export the data.

3.10.5 Maintenance Management

When more than one Device need the same configurations, you can configure parameters for them by importing or exporting configuration files.

3.10.5.1 Exporting and Importing Configuration Files

You can import and export the configuration file for the Device. When you want to apply the same configurations to multiple devices, you can import the configuration file to them.

Procedure

Step 1 Log in to the webpage.

Step 2 Select **Maintenance Center > Maintenance Management > Config**.

Figure 3-48 Configuration management

The screenshot shows a user interface for managing device configurations. At the top, there's a header labeled 'Config'. Below it is a button labeled 'Export Configuration File'. Underneath this are two input fields: 'File' and 'Browse', followed by a 'Import File' button. A yellow warning bar at the bottom states: '⚠ Imported configuration will overwrite previous configuration.'

Step 3 Export or import configuration files.

- Export the configuration file.

Click **Export Configuration File** to download the file to the local computer.

The IP will not be exported.

- Import the configuration file.

1. Click **Browse** to select the configuration file.

2. Click **Import configuration**.

+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Configuration files can only be imported to devices that have the same model.

3.10.5.2 Configuring the Fingerprint Similarity Threshold

Configure the fingerprint similarity threshold. The higher the value is, the higher accuracy is, and the lower the pass rate.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Maintenance Management > Config**.
- Step 3 Enter the similarity threshold, and then click **Apply**.

- The parameter is available on the modular access controller with the fingerprint module.
- The parameter is available on the access controller with fingerprint function.

Figure 3-49 Fingerprint similarity threshold

Fingerprint		
Fingerprint Si...	3	(1-10)
Apply	Refresh	Default

3.10.5.3 Restoring the Factory Default Settings

Procedure

- Step 1 Select **Maintenance Center > Maintenance Management > Config**.

Restoring the **Device** to its default configurations will result in data loss. Please be advised.

- Step 2 Restore to the factory default settings if necessary.
 - **Factory Defaults:** Resets all the configurations of the Device and delete all the data.
 - **Restore to Default (Except for User Info and Logs):** Resets the configurations of the Device and deletes all the data except for user information and logs.

3.10.6 Maintenance

Regularly restart the Device during its idle time to improve its performance.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **Maintenance Center > Maintenance Management > Maintenance**.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Step 3 Set the time, and then click **Apply**.

The Device will restart at the scheduled time, or you can click **Restart** to restart it immediately.

3.10.7 Updating the System

- Use the correct update file. Make sure that you get the correct update file from technical support.
- Do not disconnect the power supply or network, and do not restart or shutdown the Device during the update.
- Update to a lower version may cause potential risks. Please be advised.
- If you start the Device for the first time or restore the Device to factory default settings, the Device automatically backups the system files within the first 10 minutes. Please do not update in this period.

3.10.7.1 File Update

Procedure

Step 1 On the home page, select **Maintenance Center > Update**.

Step 2 In **File Update**, click **Browse**, and then upload the update file.

The update file should be a .bin file.

Step 3 Click **Update**.

The Device will restart after the update finishes.

3.10.7.2 Online Update

Procedure

Step 1 On the home page, select **Maintenance Center > Update**.

Step 2 In the **Online Update** area, select an update method.

- Select **Auto Check for Updates**, and the Device will automatically check for the latest version update.
- Select **Manual Check**, and you can immediately check whether the latest version is available.

Step 3 (Optional) Click **Update Now** to update the Device immediately.

3.10.8 Advanced Maintenance

Acquire device information and capture packet to make easier for maintenance personnel to perform troubleshooting.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area

sales@timewatchindia.com
www.timewatchindia.com

3.10.8.1 Exporting

Procedure

- Step 1 On the home page, select **Maintenance Center > Advanced Maintenance > Export**.
- Step 2 Click **Export** to export the serial number, firmware version, device operation logs and configuration information.

3.10.8.2 Packet Capture

Procedure

- Step 1 On the home page, select **Maintenance Center > Advanced Maintenance > Packet Capture**.

Figure 3-50 Packet Capture

Packet Capture		IP 1: Port 1	IP 2: Port 2	Packet Sniffer Size	Packet Sniffer Backup
NIC	Device Address				
eth0	192.168.1.66	[Optional]	[Optional]	0.00MB	▶
eth2	192.168.1.101	[Optional]	[Optional]	0.00MB	▶

- Step 2 Enter the IP address, click .  changes to .
- Step 3 After you acquired enough data, click .
- Captured packets are automatically downloaded to your local computer.

3.11 Security Settings(Optional)

3.11.1 Security Status

Scan the users, service, and security modules to check the security status of the Device.

Background Information

- User and service detection: Check whether the current configuration conforms to recommendation.
- Security modules scanning: Scan the running status of security modules, such as audio and video transmission, trusted protection, securing warning and attack defense, not detect whether they are enabled.

Procedure

- Step 1 Select  > **Security Status**.
- Step 2 Click **Rescan** to perform a security scan of the Device.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

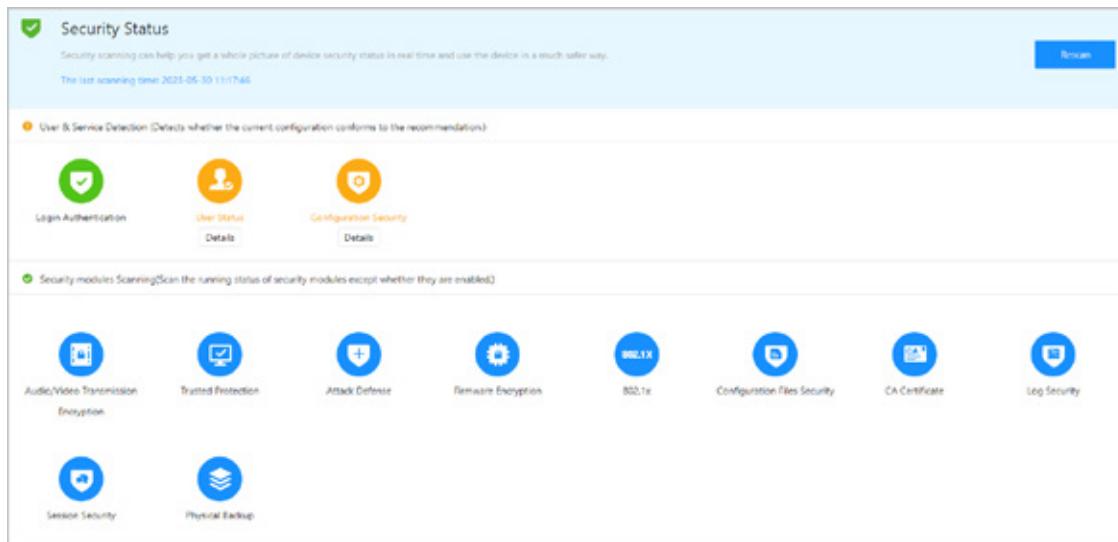

sales@timewatchindia.com
www.timewatchindia.com

Hover over the icons of the security modules to see their running status.

Figure 3-51 Security Status

The screenshot shows the 'Security Status' section of the TIMEWATCH interface. It includes a summary message about device security status, the last scanning time (2023-05-30 11:17:46), and a 'Review' button. Below this, there are two main sections: 'User & Service Detection' (with icons for Login Authentication, User Status, and Configuration Security) and 'Security modules Scanning' (with icons for various modules like Audio/Video Transmission Encryption, Trusted Protection, Attack Defense, Remote Encryption, 802.1x, Configuration Files Security, CA Certificate, Log Security, Session Security, and Physical Backup). Each module icon has a 'Details' link below it.

Related Operations

After you perform the scan, the results will be displayed in different colors. Yellow indicates that the security modules are abnormal, and green indicates that the security modules are normal.

- Click **Details** to view the details on the results of the scan.
- Click **Ignore** to ignore the abnormality, and it will not be scanned. The abnormality that was ignored will be highlighted in grey.
- Click **Optimize** to troubleshoot the abnormality.

3.11.2 Configuring System Service

Create a certificate or upload an authenticated certificate, and then you can log in to the webpage through HTTPS on your computer. HTTPS secures communication over a computer network.

Procedure

Step 1 Select  > **System Service** > **System Service**.

Step 2 Turn on the HTTPS service.

If you turn on the compatible with TLS v1.1 and earlier versions, security risks might occur.

Please be advised.

Step 3 Select the certificate.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

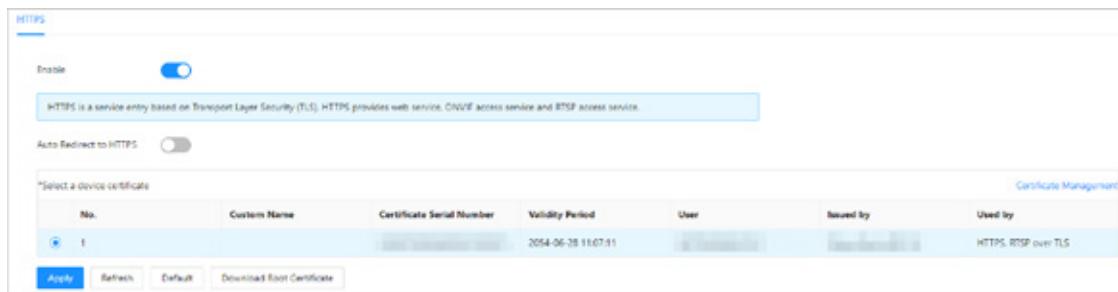

sales@timewatchindia.com
www.timewatchindia.com

If there are no certificates in the list, click **Certificate Management** to upload a certificate.

Figure 3-52 System service

No.	Custom Name	Certificate Serial Number	Validity Period	User	Issued by	Used by
1			2024-06-28 11:07:51			HTTPS, RTSP over TLS

Step 4 Click **Apply**.

Enter "https://IP address. httpsport" in a web browser. If the certificate is installed, you can log in to the webpage successfully. If not, the webpage will display the certificate as wrong or untrusted.

3.11.3 Attack Defense

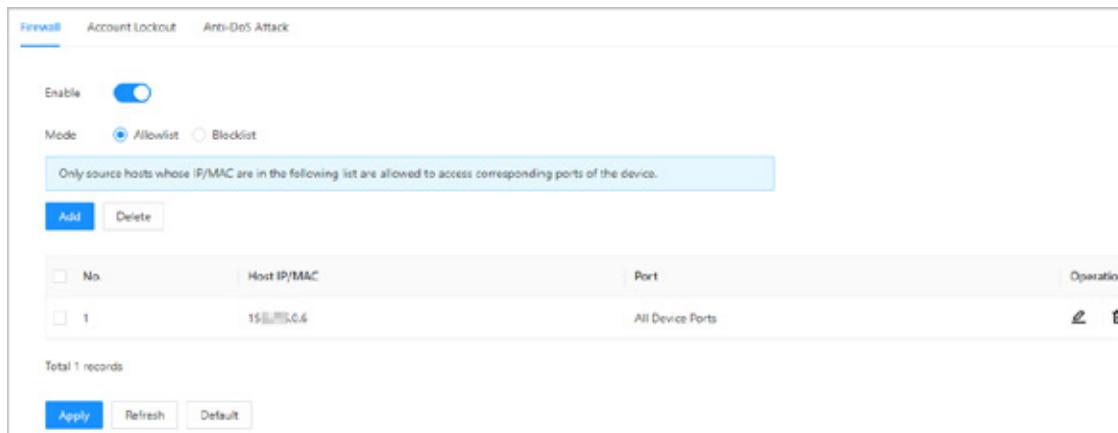

3.11.3.1 Configuring Firewall

Configure firewall to limit access to the Device.

Procedure

- Step 1 Select  > **Attack Defense > Firewall**.
- Step 2 Click  to enable the firewall function.

Figure 3-53 Firewall

No.	Host IP/MAC	Port	Operations
1	192.168.0.6	All Device Ports	 

Step 3 Select the mode: **Allowlist** and **Blocklist**.

- **Allowlist:** Only IP/MAC addresses on the allowlist can access the Device.
- **Blocklist:** The IP/MAC addresses on the blocklist cannot access the Device.

Step 4 Click **Add** to enter the IP information.

- **Login Attempt:** The limit of login attempts. If the incorrect password is entered for a defined number of times, the account will be locked.
- **Lock Time:** The duration during which you cannot log in after the account is locked.

Step 3 Click **Apply**.

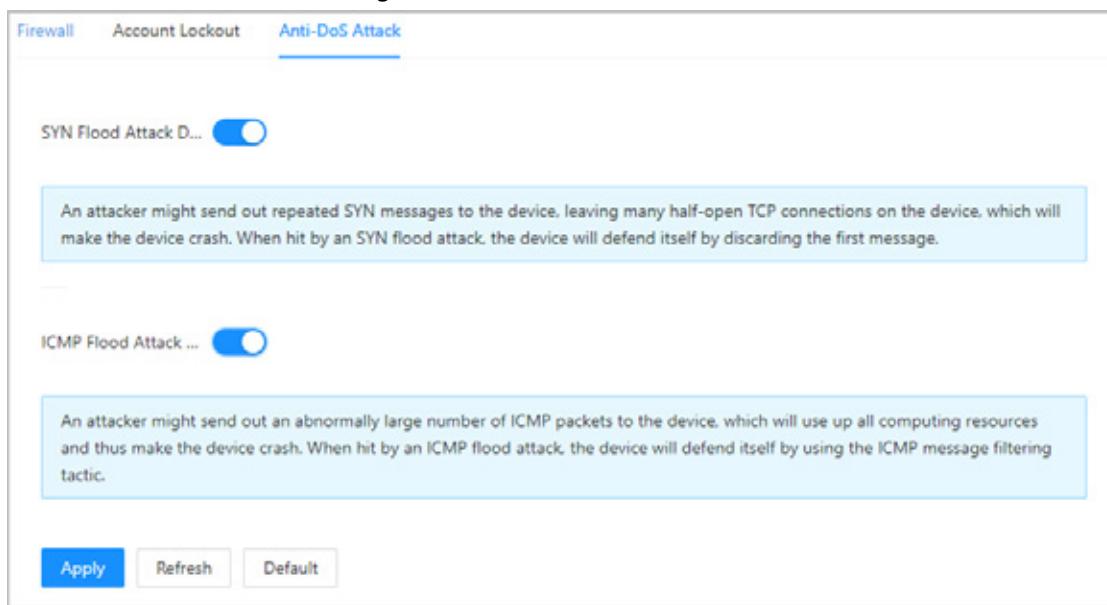

3.11.3.3 Configuring Anti-DoS Attack

You can enable **SYN Flood Attack Defense** and **ICMP Flood Attack Defense** to defend the Device against Dos attacks.

Procedure

- Step 1 Select  > **Attack Defense** > **Anti-DoS Attack**.
- Step 2 Turn on **SYN Flood Attack Defense** or **ICMP Flood Attack Defense** to protect the Device against Dos attack.

Figure 3-56 Anti-DoS attack

Anti-DoS Attack

SYN Flood Attack D...

An attacker might send out repeated SYN messages to the device, leaving many half-open TCP connections on the device, which will make the device crash. When hit by an SYN flood attack, the device will defend itself by discarding the first message.

ICMP Flood Attack ...

An attacker might send out an abnormally large number of ICMP packets to the device, which will use up all computing resources and thus make the device crash. When hit by an ICMP flood attack, the device will defend itself by using the ICMP message filtering tactic.

Buttons: Apply, Refresh, Default

Step 3 Click **Apply**.

sales@timewatchindia.com
www.timewatchindia.com

servers. For example, when 802.1x protocol is used, the CA certificate for switches is required to authenticate its identity.

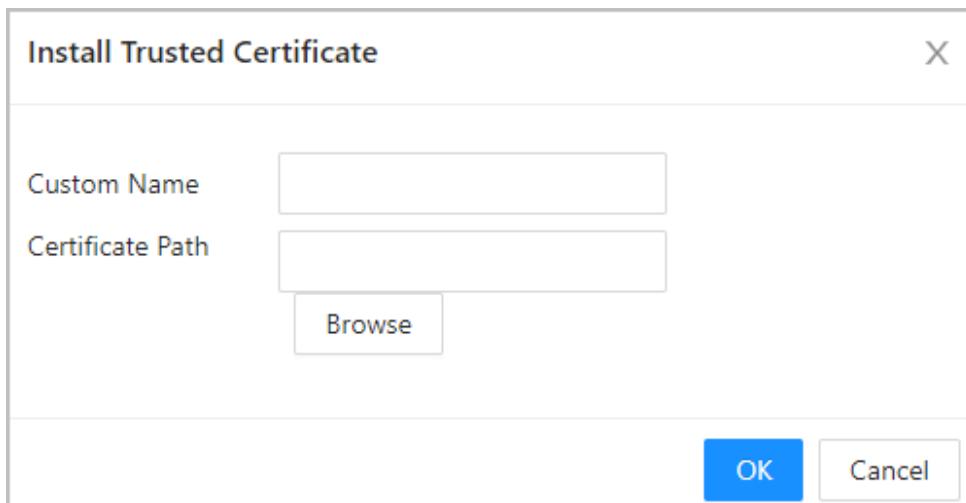

Background Information

802.1X is a network authentication protocol that opens ports for network access when an organization authenticates a user's identity and authorizes them access to the network.

Procedure

- Step 1 Select  > **CA Certificate > Trusted CA Certificates**.
- Step 2 Select **Install Trusted Certificate**.
- Step 3 Click **Browse** to select the trusted certificate.

Figure 3-60 Install the trusted certificate

- Step 4 Click **OK**.

The newly installed certificate is displayed on the **Trusted CA Certificates** page after the certificate is successfully installed.

Related Operations

- Click **Edit Mode** on the **Device Certificate** page to edit the name of the certificate.
- Click  to download the certificate.
- Click  to delete the certificate.

3.11.6 Data Encryption

Procedure

- Step 1 Select  > **Data Encryption**.
- Step 2 Configure the parameters.

Figure 3-61 Data encryption

The screenshot shows the 'Data encryption' configuration page. It has two main sections: 'Private Protocol' and 'RTSP over TLS'. In 'Private Protocol', 'Enable' is checked, and a note says 'Stream transmission is encrypted by using private protocol.' Below it, 'AES256-OFB' is selected as the 'Encryption Type' and 'Update Period...' is set to '12 hr (0-720)'. In 'RTSP over TLS', 'Enable' is also checked, with a note 'RTSP stream is encrypted by using TLS tunnel before transmission.' A 'Certificate Management' table lists one certificate: No. 1, Custom Name 3930301, Certificate Serial Number 343436363232, Validity Period 2023-05-30 11:40:22, User 8CD08301AU6759, Issued by BSC, Used by HTTPS: RTSP over TLS. Buttons at the bottom include 'Apply', 'Refresh', and 'Default'.

Table 3-29 Data encryption description

	Parameter	Description
Private Protocol	Enable	Streams are encrypted during transmission through private protocol.
	Encryption Type	Keep it as default.
	Update Period of Secret Key	Ranges from 0 h -720 h. 0 means never update the secret key.
RTSP over TLS	Enable	RTSP stream is encrypted during transmission through TLS tunnel.
	Certificate Management	Create or import certificate. For details, see "3.11.4 Installing Device Certificate". The installed certificates are displayed in the list.

3.11.7 Security Warning

Procedure

- Step 1 Select  > **Security Warning**.
- Step 2 Enable the security warning function.
- Step 3 Select the monitoring items.

Figure 3-62 Security warning

The screenshot shows the 'Security Warning' configuration page. It features an 'Event Monitoring' section with several checkboxes: 'Invalid executable programs attempting to run', 'Web directory bruteforcing', 'Number of session connections exceeds limit', 'Session ID bruteforcing', 'Login not in the specified time range', and 'Brute force attack of the account'. A note at the bottom states: 'Security warning can detect device security status in real time, and keep you informed of the security exception events immediately, so that you can deal with them timely and avoid security risks.' Buttons at the bottom are 'Apply', 'Refresh', and 'Default'.

4 Phone Operations

Before logging in to the webpage of the Device on your phone, make sure that you have initialized the Device through the webpage on the computer.

We recommend you use your phone in portrait mode and day mode. You can log in to the webpage of the Device on your phone through the following methods.

- Connect the Device to the network through the network cable. Make sure the phone and the Device are in the same network. Open the browser on the phone, and then enter the IP address of the Device.
- Connect the Device and the phone to the network through the same Wi-Fi. Open the browser on the phone, and then enter the IP address according to the connected Wi-Fi.
- Connect the phone to the network through the Device Wi-Fi. Open the browser on the phone, and then enter the IP address according to the Wi-Fi AP on the Device (it is 192.168.3.1 by default).

The Device Wi-Fi name is displayed in the **Device serial number + Device model** mode.

- The Wi-Fi and Wi-Fi AP are available on select models.
- Only English is supported when you log in to the webpage on the phone.

4.1 Logging in to the Webpage

Prerequisites

Make sure that the phone used to log in to the webpage is on the same LAN as the Device.

Procedure

- Step 1 Open a browser, and then enter to the IP address of the Device.
- Step 2 Enter the user name and password.

Parameter	Description
Card	<ul style="list-style-type: none"> Enter the card number manually. Click Add. Enter the card number, and then click Add. <p>Read the number automatically through the Device.</p> <ol style="list-style-type: none"> Click Add. Swipe cards on the card reader. <p>A 60-second countdown is displayed to remind you to swipe cards, and the system will read the card number automatically. If the 60-second countdown expires, click Read Card again to start a new countdown.</p> <ol style="list-style-type: none"> Click OK. <p>A user can register up to 5 cards at most. Enter your card number or swipe your card, and then the card information will be read by the Device.</p> <p>You can enable the Duress Card function. An alarm will be triggered if a duress card is used to unlock the door.</p> <ul style="list-style-type: none"> Duress Card: Click to set duress card. Change Card No.: Click to change the card number. <p> One user can only set one duress card.</p>
Fingerprint	<p>Register fingerprints. A user can register up to 3 fingerprints, and you can set a fingerprint to the duress fingerprint. An alarm will be triggered when the duress fingerprint is used to unlock the door.</p> <p>Enroll fingerprints through an enrollment reader or the Device.</p> <ol style="list-style-type: none"> Click Add. Press finger on the scanner according to the on-screen instructions. Click OK. <p></p> <ul style="list-style-type: none"> Fingerprint function is only available on select models. We do not recommend you set the first fingerprint as the duress fingerprint. One user can only sets one duress fingerprint.
Permission	<ul style="list-style-type: none"> User: Users only have door access or time attendance permissions. Admin: Administrators can configure the Device besides door access and attendance permissions.

Parameter	Description
Validity Period	Set a date on which the door access and attendance permissions of the person will be expired.
Period	<p>People can unlock the door or take attendance during the defined period.</p> <p></p> <p>You can select more than one period.</p>
Holiday Plan	<p>People can unlock the door or take attendance during the defined holiday.</p> <p></p> <p>You can select more than one holiday.</p>
User Type	<ul style="list-style-type: none"> General User: General users can unlock the door. Blocklist User: When users in the blocklist unlock the door, service personnel will receive a notification. Guest User: Guests can unlock the door within a defined period or for certain amount of times. After the defined period expires or the unlocking times runs out, they cannot unlock the door. Patrol User: Patrol users can take attendance on the Device, but they do not have door permissions. VIP User: When VIP unlock the door, service personnel will receive a notice. Other User: When they unlock the door, the door will stay unlocked for 5 more seconds. Custom User 1/Custom User 2: Same with general users.
Time Used	Set an unlock limit for guest users. After the unlock times run out, they cannot unlock the door.
Department	Add users to a department. If a department schedule is

Parameter	Description
Schedule Mode	<p>assigned to the person, they will follow the established department schedule.</p> <ul style="list-style-type: none"> • Department Schedule: Assign department schedule to the user. • Personal Schedule: Assign personal schedule to the user. <p></p> <p>◊ This function is only available on select models.</p> <p>◊ If you set the schedule mode to department schedule here, the personal schedule you have configured for the user in Attendance > Schedule Config > Personal Schedule is invalid.</p>

Step 4 Click **Add**.

4.4 Configuring the System

4.4.1 Viewing Version Information

On the webpage, select **More > System > Version**, and you can view version information on the Device.

4.4.2 Maintenance

Regularly restart the Device during its idle time to improve its performance.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > System > Maintenance**.
- Step 3 Set the time, and then click **Apply**.

The Device will restart at the scheduled time, or you can click **Restart** to restart it immediately.

Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Figure 4-12 Configure the shift

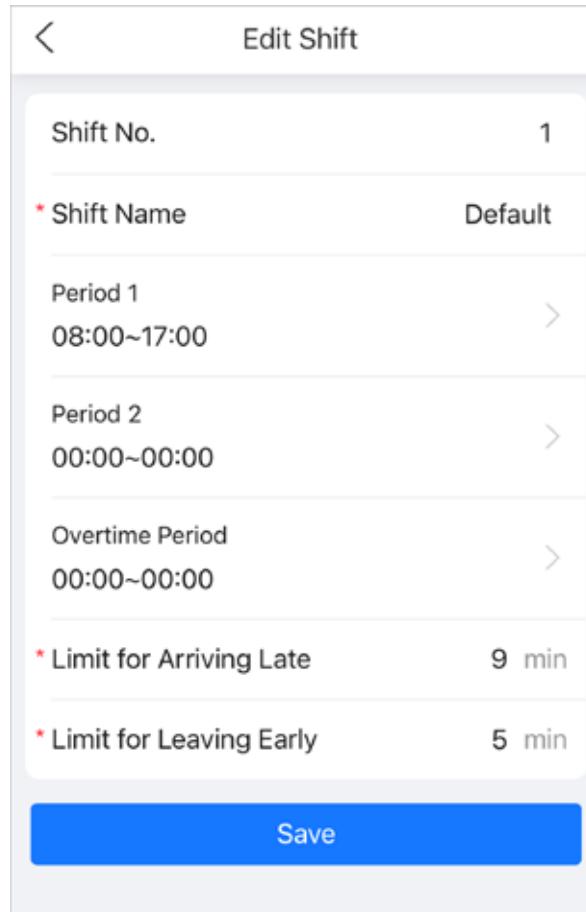

Table 4-3 Shift parameters description

Parameter	Description
Shift Name	Enter the name of the shift.
Period 1	Specify a time range when people can clock in and clock out for the workday.
Period 2	If you only set one attendance period, employees need to clock in and out by the designated times to avoid an anomaly appearing on their attendance record. For example, if you set 08:00 to 17:00, employees must clock in by 08:00 and clock out from 17:00 onwards. If you set 2 attendance periods, the 2 periods cannot overlap. Employees need to clock in and clock out for both periods.
Overtime Period	Employees who clock in or out during the defined period will be considered as working beyond their normal work hours.
Limit for Arriving Late	A certain amount of time can be granted to employees to allow them to clock in a bit late and clock out a bit early. For example, if the regular time to clock in is 08:00, the tolerance period can be set as 5 minutes for employees who arrive by 08:05 to not be considered as late.
Limit for Leaving Early	

- When the time interval between 2 periods is an even number, you can divide the time interval by 2, and assign the first half of the interval to the first period, which will be the clock out time. The second half of the interval should be assigned to the second period as the clock in time.

(+91)-11-41916615
+91-95999-53923

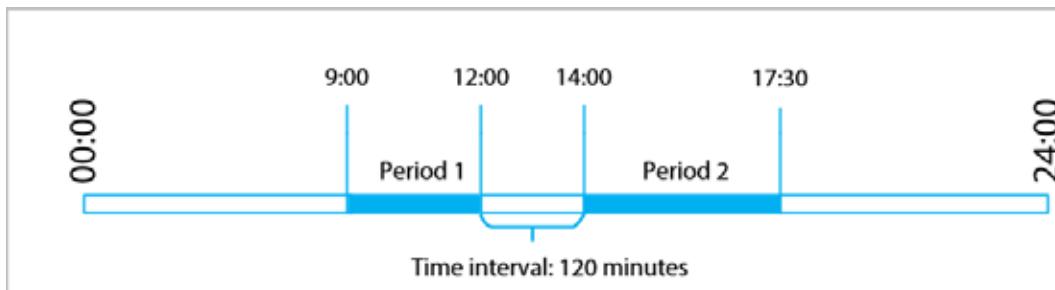

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Figure 4-13 Time interval (even number)

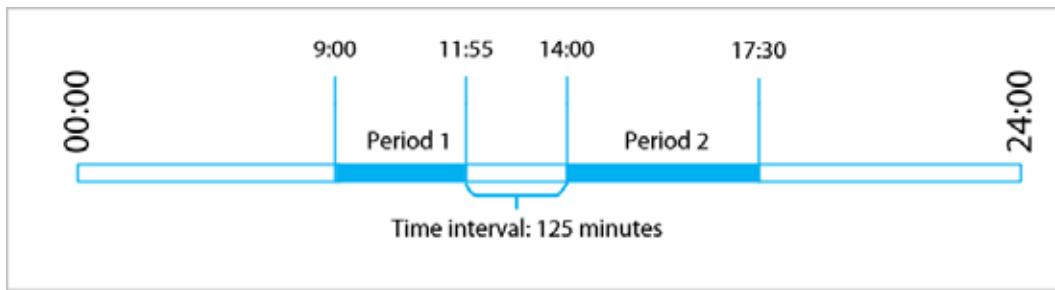

For example: If the interval is 120 minutes, then the clock-out time for period 1 is from 12:00 to 12:59, and the clock-in time for period 2 is from 13:00 to 14:00.

If a person clocks out multiple times during period 1, the latest time will be valid, and if they clock in multiple times during period 2, the earliest time will be valid.

- When the time interval between 2 periods is an odd number, the smallest portion of the interval will be assigned to the first period, which will be the clock out time. The largest portion of the interval will be assigned to the second period as the clock in time.

Figure 4-14 Time interval (even number)

For example: If the interval is 125 minutes, then the clock-out time for period 1 is from 11:55 to 12:57, and the clock-in time for period 2 is from 12:58 to 14:00. Period 1 has 62 minutes, and period 2 has 63 minutes.

If a person clocks out multiple times during period 1, the latest time will be valid, and if they clock in multiple times during period 2, the earliest time will be valid.

All attendance times are precise down to the second. For example, if the normal clock-in time is set to 8:05 AM, the employee who clocks in at 8:05:59 AM will not be considered as arriving late. But, the employee that arrives at 8:06 AM will be marked as late by 1 minute.

Related Operations

You can click  to restore shifts to factory defaults.

Table 4-6 Description of face parameters

Name	Description
Face Recognition Threshold	<p>Adjust the accuracy level of face recognition. Higher threshold means higher accuracy and lower false recognition rate.</p> <p></p> <p>When the threshold is too low such as 0, the false recognition rate will be extremely high. Please be advised.</p>
Max Face Recognition Angle Deviation	Set the largest angle that a face can be posed in for face detection. The larger the value, the larger the range for the face angle. If the angle a face is positioned in is not within the defined range, it might not be detected properly.
Anti-spoofing Level	This prevents people from being able to use photos, videos, mask and other substitutes to gain unauthorized access.
Valid Face Interval (sec)	When the same face remains in front of the lens after the first successful recognition, the Device will perform recognition again for the face after a defined interval.
Invalid Face Interval (sec)	When the same face remains in front of the lens after the first failed recognition, the Device will perform recognition again for the face after a defined interval.
Recognition Distance	The distance between the face and the lens.
Smart Screen Light Up	When enabled, in the screen-off status, the screen will light up when a face is detected.

4.6.3 Configuring Access Control Parameters

Procedure

- Step 1 Log in to the webpage.
- Step 2 Click **Access Control Parameters** on the main menu, or select **More > Access Control > Access Control Parameters**.

Parameter	Description	
	Door Status	<p>Set the door status.</p> <ul style="list-style-type: none"> Normal: The door will be unlocked and locked according to your settings. Always Open: The door remains unlocked all the time. Always Closed: The door remains locked all the time.
	Verification Interval	If you verify your identity multiple times within a set period, only the earliest verification will be considered valid, and the door will not open after the second or later verifications. From the moment the door fails to open, you must wait for the configured verification time interval before attempting to verify your identity again.
Normally Open Period	Period/Holiday Plan	When you select Normal , you can select a time template from the drop-down list. The door remains open or closed during the defined time.
Normally Closed Period	Period/Holiday Plan	 <ul style="list-style-type: none"> When normally open period conflicts with normally closed period, normally open period takes priority over normally closed period. When period conflict with holiday plan, holiday plans takes priority over periods.
Unlock Settings	Unlock Method	Combination Unlock by default.
	Combination Method	<ul style="list-style-type: none"> Or: Use one of the selected unlock methods to open the door. And: Use all the selected unlock methods to open the door.
	Unlock Method	Select the unlock method according to the supported capabilities of the Device.
	Door Unlocked Duration	Configure the time in which the door keeps the open status. It is 3 seconds by default. When the door opens for more than the configured time, the door closes.
	Remote Verification	When enabled, configure the period and the holiday plan.

Step 4 Click **Apply**.

4.6.4 Configuring Alarms

An alarm will be triggered when an abnormal access event occurs.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Access Control > Alarm**.
- Step 3 Configure alarm parameters, and then click **Apply**.

Figure 4-23 Alarm settings

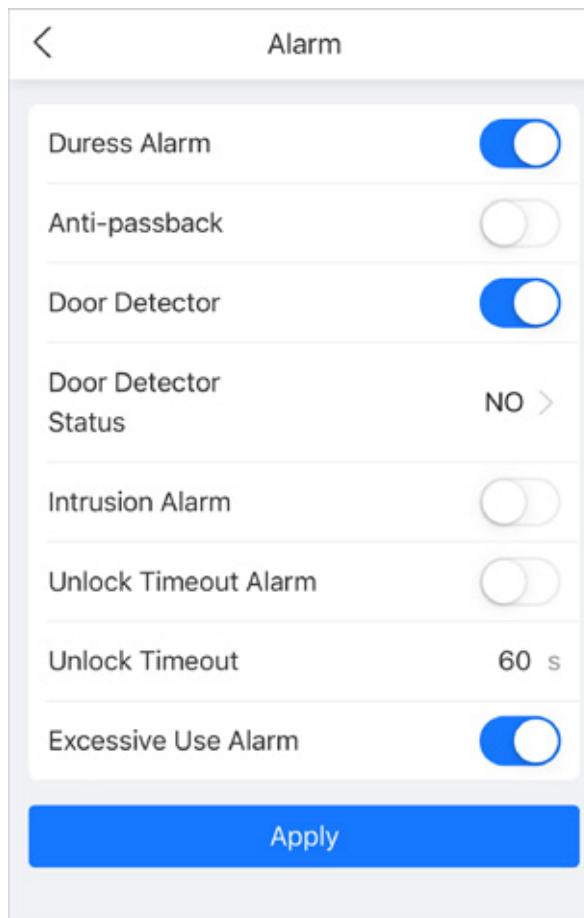

Table 4-8 Description of alarm parameters

Parameter	Description
Duress Alarm	An alarm will be triggered when a duress card, duress password or duress fingerprint is used to unlock the door.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

Parameter	Description
Anti-passback	<p>Users need to verify their identities both for entry and exit; otherwise an alarm will be triggered. It helps prevents a card holder from passing an access card back to another person to gain entry. When anti-passback is enabled, the card holder must leave the secured area through an exit reader before system will grant another entry.</p> <ul style="list-style-type: none"> • If a person enters after authorization and exits without authorization, an alarm will be triggered when they attempt to enter again, and access is denied at the same time. • If a person enters without authorization and exits after authorization, an alarm will be triggered when they attempt to enter again, and access is denied at the same time. <p> If the Device can only connect one lock, verifying on the Device means entry direction, and verifying on the external card reader means exit direction by default. You can modify the setting on the management platform.</p>
Door Detector	<p>With the door detector wired to your device, alarm can be triggered when doors are opened or closed abnormally. The door detector includes 2 types, including NC detector and NO detector.</p> <ul style="list-style-type: none"> • Normally Closed: The sensor is in a shorted position when the door or window is closed. • Normally Open: An open circuit is created when the window or door is actually closed.
Intrusion Alarm	<p>If the door is opened abnormally, an intrusion alarm will be triggered and last for a defined time.</p> <p> The door detector and intrusion need to be enabled at the same time.</p>
Unlock Timeout Alarm	<p>When the door remains unlocked for longer than the defined timeout duration, the door timeout alarm will be triggered and last for the defined time.</p>
Unlock Timeout	<p> The door detector and door timed out function need to be enabled at the same time.</p>

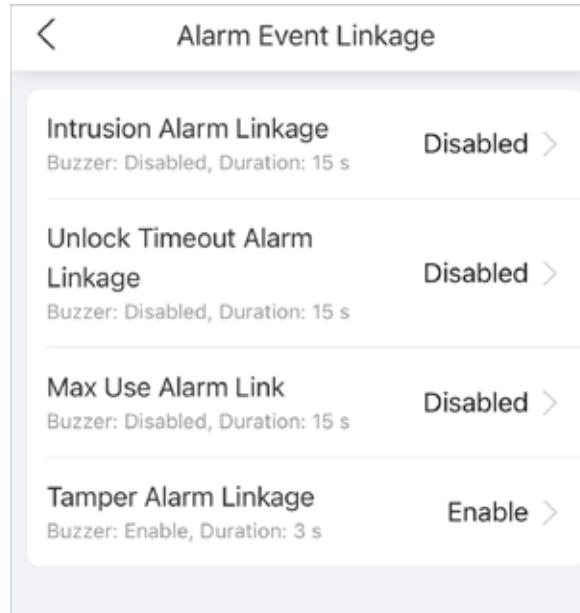

Parameter	Description
Excessive Use Alarm	If the wrong password or card is used 5 times in a row within 60 seconds, the alarm for excessive use of illegal card will be triggered and lasts for a defined time.

4.6.5 Configuring Alarm Event Linkage

Procedure

- Step 1 Log in to the webpage.
Step 2 Select **More > Access Control > Alarm Event Linkage**.

Figure 4-24 Alarm event linkage

- Step 3 Click the linkage to configure the alarm linkage, and then click **OK**.

Table 4-9 Alarm event linkage

Parameter	Description
Intrusion Alarm Linkage	If the door is opened abnormally, an intrusion alarm will be triggered. Buzzer: The buzzer sounds when an intrusion alarm is triggered. You can configure the alarm duration.
Unlock Timeout Alarm Linkage	When the door remains unlocked for longer than the defined timeout duration, the door timeout alarm will be triggered and last for the defined time. Buzzer: The buzzer sounds when the unlock timeout alarm is triggered. You can configure the alarm duration.
Max Use Alarm Link	If the wrong password or card is used 5 times in a row within 60 seconds, the alarm for excessive use of illegal card will be triggered and lasts for a defined time. Buzzer: The buzzer sounds when the excessive use alarm is triggered. You can configure the alarm duration.

Parameter	Description
Tamper Alarm Linkage	The tamper alarm is triggered when someone has tried to physically damage the Device. Buzzer: The buzzer sounds when the tamper alarm is triggered. You can configure the alarm duration.

4.6.6 Configuring Card Settings

Background Information

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Access Control > Card Settings**.
- Step 3 Configure the card parameters, and then click **Apply**.

Figure 4-25 Card settings (1)

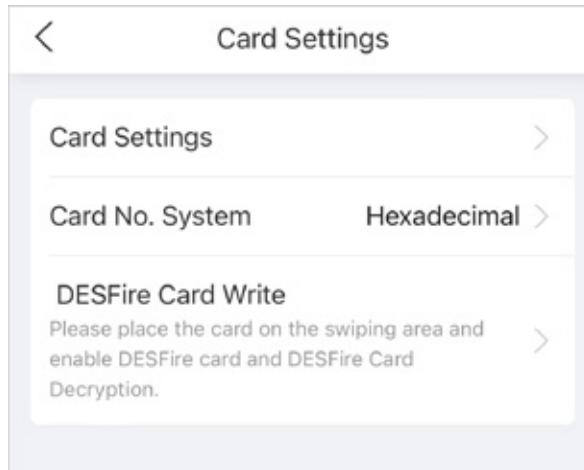

Figure 4-26 Card settings (2)

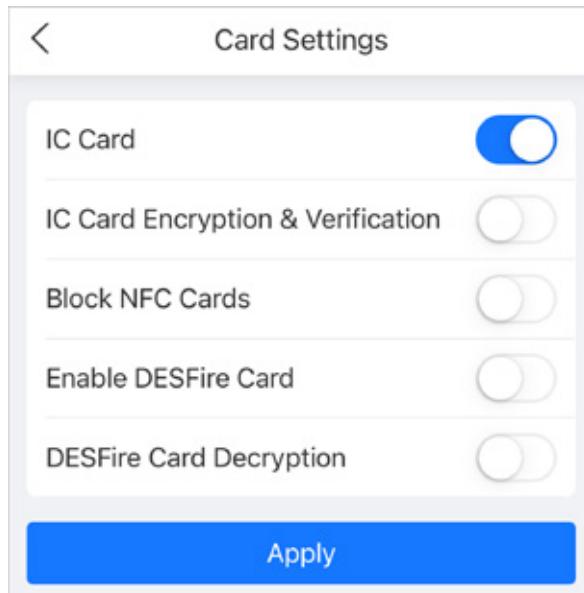

Table 4-10 Card parameters description

Item	Parameter	Description
Card Settings	IC Card	<p>The IC card can be read when this function is enabled.</p> <p></p> <p>This function is only available on select models.</p>
	IC Card Encryption & Verification	<p>The encrypted card can be read when this function is enabled.</p> <p></p> <p>Make sure IC Card is enabled.</p>
	Block NFC Cards	<p>Prevent unlocking through duplicated NFC card after this function is enabled.</p> <p></p> <ul style="list-style-type: none"> This function is only available on models that support IC cards. Make sure IC Card is enabled. NFC function is only available on select models of phones.
	Enable Desfire Card	<p>The Device can read the card number of Desfire card when this function is enabled.</p> <p></p> <ul style="list-style-type: none"> This function is only available on models that support IC cards. Only supports hexadecimal format.
	Desfire Card Decryption	<p>Information in the Desfire card can be read when Enable Desfire Card and Desfire Card Decryption are enabled at the same time.</p> <p></p> <ul style="list-style-type: none"> This function is only available on models that support IC cards. Make sure that Desfire card is enabled.

Item	Parameter	Description
Card No. System	Card No. System	Select decimal format or hexadecimal format for the card number when Wiegand card reader is connected. The card No. system is the same for both card number input and output.
DESFire Card Write	Card Number	<p>Place the card on the reader, enter the card number, and then click Write to write card number to the card.</p> <p></p> <ul style="list-style-type: none"> Desfire card function must be enabled. Only supports hexadecimal format. Supports up to 8 characters.

Step 4 Click **Apply**.

4.6.7 Privacy Setting

Procedure

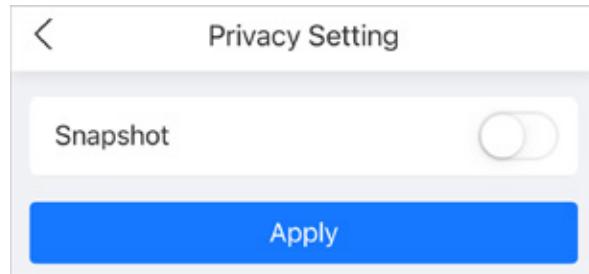

Step 1 Log in to the webpage.

Step 2 Select **More > Access Control > Privacy Setting**.

Step 3 Enable snapshot function.

Face images will be captured automatically when people unlock the door.

Figure 4-27 Enable snapshot

Step 4 Click **Apply**.

4.7 Communication Settings

4.7.1 Configuring TCP/IP

You need to configure IP address of Device to make sure that it can communicate with other devices.

Procedure

Step 1 Log in to the webpage.

Step 2 Select **More > Communication Settings > Network Setting > TCP/IP**.

Step 3 Configure the parameters, and then click **Apply**.

Figure 4-28 TCP/IP

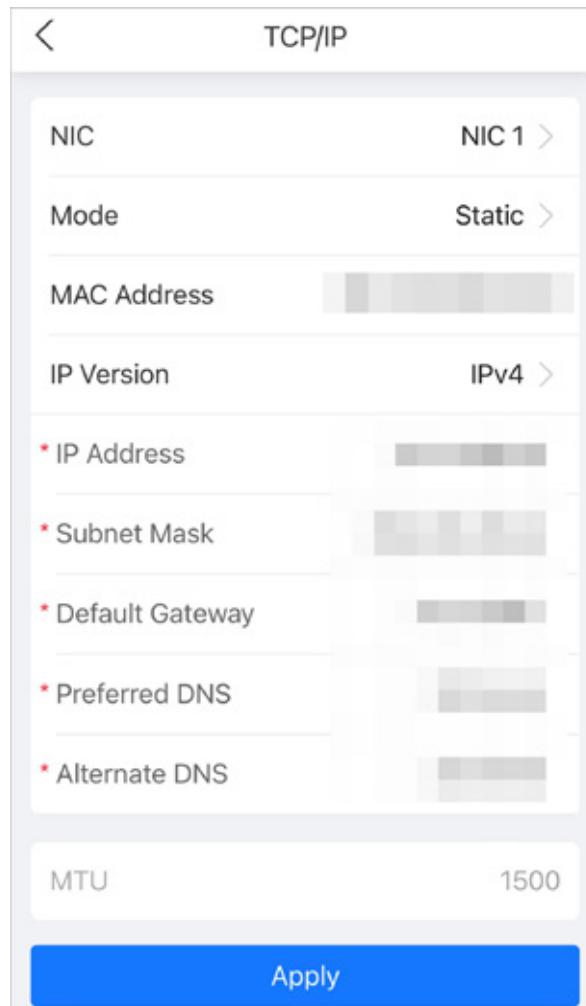

Table 4-11 Description of TCP/IP

Parameter	Description
Mode	<ul style="list-style-type: none"> Static: Manually enter IP address, subnet mask, and gateway. DHCP: It stands for Dynamic Host Configuration Protocol. When DHCP is turned on, the Device will automatically be assigned with IP address, subnet mask, and gateway.
MAC Address	MAC address of the Device.
IP Version	IPv4 or IPv6.
IP Address	If you set the mode to Static , configure the IP address, subnet mask and gateway.
Subnet Mask	
Default Gateway	<p></p> <ul style="list-style-type: none"> IPv6 address is represented in hexadecimal. IPv6 version do not require setting subnet masks. The IP address and default gateway must be in the same network segment.
Preferred DNS	Set IP address of the preferred DNS server.
Alternate DNS	Set IP address of the alternate DNS server.

Parameter	Description
MTU	<p>MTU (Maximum Transmission Unit) refers to the maximum size of data that can be transmitted in a single network packet in computer networks. A larger MTU value can improve network transmission efficiency by reducing the number of packets and associated network overhead. If a device along the network path is unable to handle packets of a specific size, it can result in packet fragmentation or transmission errors. In Ethernet networks, the common MTU value is 1500 bytes. However, in certain cases such as using PPPoE or VPN, smaller MTU values may be required to accommodate the requirements of specific network protocols or services. The following are recommended MTU values for reference:</p> <ul style="list-style-type: none"> • 1500: Maximum value for Ethernet packets, also the default value. This is a typical setting for network connections without PPPoE and VPN, some routers, network adapters, and switches. • 1492: Optimal value for PPPoE • 1468: Optimal value for DHCP. • 1450: Optimal value for VPN.

4.7.2 Configuring Wi-Fi

Procedure

- Step 1 Log in to the webpage.
 - Step 2 Select **More > Communication Settings > Wi-Fi**.
 - Step 3 Turn on Wi-Fi.
All available Wi-Fi are displayed.
-  ● The Wi-Fi function is available on select models.
● The Wi-Fi and Wi-Fi AP cannot be enabled at the same time.
- Step 4 Click the Wi-Fi, and then enter the password.
The Wi-Fi is connected.

Related Operations

- DHCP: Select the **DHCP** mode and click **Apply**, the Device will automatically be assigned a Wi-Fi address.
- Static: Select the **Static** mode, manually enter a Wi-Fi address, and then click **Apply**, the Device will connect to the Wi-Fi.

4.7.5 Configuring Auto Registration

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Network Setting > Auto Registration**.
- Step 3 Enable the auto registration function, configure the parameters, and then click **Apply**.

Figure 4-30 Auto registration

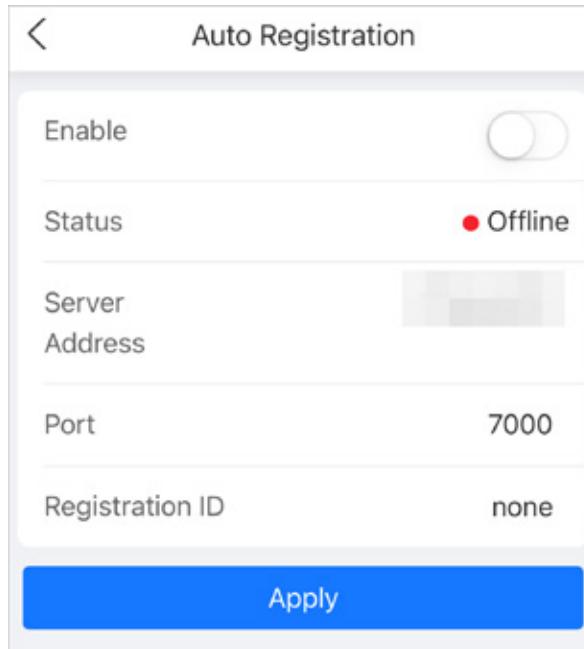

Table 4-12 Automatic registration description

Parameter	Description
Status	Displays the connection status of auto registration.
Server Address	The IP address or the domain name of the server.
Port	The port of the server that is used for automatic registration.
Registration ID	The registration ID (user defined) of the device. Adding the device to the management by entering the registration ID on the platform.

4.7.6 Configuring Wiegand

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Communication Settings > Wiegand**.
- Step 3 Select a Wiegand type, configure the parameters, and then click **Apply**.
 - Select **Wiegand Input** when you connect an external card reader to the Device.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area

Parameter	Description
Pulse Interval	
Output Data Type	<p>Select the type of output data.</p> <ul style="list-style-type: none"> • No.: Outputs data based on user ID. The data format is hexadecimal or decimal. • Card Number: Outputs data based on user's first card number.

4.7.7 Configuring RS-485

Configure the RS-485 parameters if you connect an external device to the RS-485 port.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Communication Settings > RS-485 Settings**.
- Step 3 Configure the parameters, and then click **Apply**.

Figure 4-33 RS-485 settings

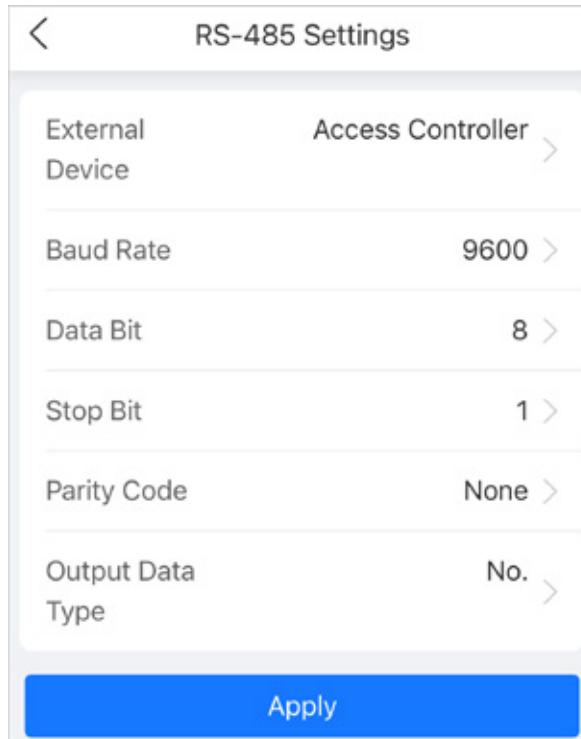

Table 4-14 Description of RS-485 parameters

Parameter	Description
External Device	<ul style="list-style-type: none"> Access Controller Select Access Controller when the Device functions as a card reader, and sends data to other external access controllers to control access. Card Reader: The Device functions as an access controller, and connects to an external card reader. Reader (OSDP): The Device is connected to a card reader based on OSDP protocol. Door Control Security: The door exit button, lock and fire linkage is not effective after the security module is enabled.
Baud Rate	Select the baud rate. It is 9600 by default.
Data Bit	The number of bits used to transmit the actual data in a serial communication. It represents the binary digits that carry the information being transmitted.
Stop Bit	A bit sent after the data and optional parity bits to indicate the end of a data transmission. It allows the receiver to prepare for the next byte of data and provides synchronization in the communication protocol.
Parity Code	An additional bit sent after the data bits to detect transmission errors. It helps verify the integrity of the transmitted data by ensuring a specific number of logical high or low bits.
Output Data Type	When you configure the external device as Access Controller . <ul style="list-style-type: none"> Card Number: Outputs data based on card number when users swipe card to unlock door; outputs data based on user's first card number when they use other unlock methods. No.: Outputs data based on the user ID.

4.8 Configuring Audio Prompts

Set audio prompts during identity verification.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Audio and Video Config > Audio**.
- Step 3 Configure the audio parameters, and then click **Apply**.

Figure 4-34 Configure the audio parameters

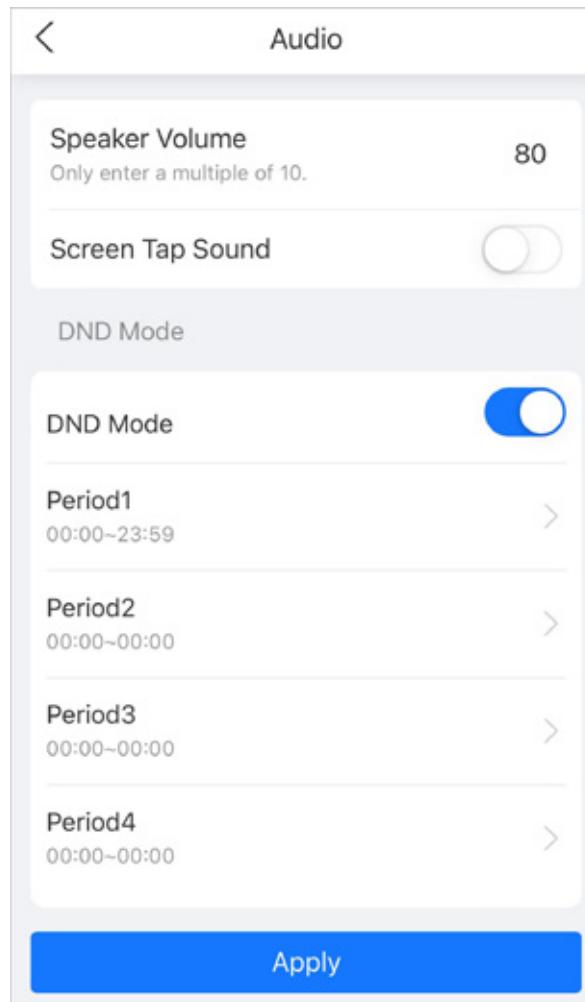

Table 4-15 Parameters description

Parameters	Description
Speaker Volume	Set the volume of the speaker.
Screen Tap Sound	When this function is enabled, the device will produce sound when pressing the button.
DND Mode	No voice prompts during the set time when you verify your identity on the Device. You can set up to 4 periods.

4.9 Viewing Logs

View logs such as system logs, unlock records, and alarm logs.

4.9.1 System Logs

View and search for system logs.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Log > Log**.

4.9.2 Unlock Records

Search for unlock records.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Log > Unlock Records**.
- Step 3 Click the record to view the details.

4.9.3 Alarm Logs

View alarm logs.

Procedure

- Step 1 Log in to the webpage.
- Step 2 Select **More > Log > Alarm Log**.

5 Smart PSS Lite Configuration

This section introduces how to manage and configure the device through Smart PSS Lite. For details, see the user's manual of Smart PSS Lite.

5.1 Installing and Logging In

Install and log in to Smart PSS Lite. For details, see the user manual of Smart PSS Lite.

Procedure

- Step 1 Get the software package of the Smart PSS Lite from the technical support, and then install and run the software according to instructions.
- Step 2 Initialize Smart PSS Lite when you log in for the first time, including setting password and security questions.
 Set the password is for the first-time use, and then set security questions to reset your password when you forgot it.
- Step 3 Enter your username and password to log in to Smart PSS Lite.

5.2 Adding Devices

You need to add the Device to Smart PSS Lite. You can add them in batches or individually.

5.2.1 Adding Device One by One

You can add devices one by one through entering their IP addresses or domain names.

Procedure

- Step 1 On the **Device Manager** page, click **Add**.
- Step 2 Configure the information of the device.

Figure 5-1 Add devices

Add Device

Device Name: *

Method to add:

IP/Domain: *

Port: *

User Name: *

Password: *

Table 5-1 Parameters of IP adding

Parameter	Description
Device Name	We recommend you name devices with the monitoring area for easy identification.
Method to add	Select IP/Domain . <ul style="list-style-type: none"> IP/Domain: Enter the IP address or domain name of the device. SN: Enter the serial number of the device.
Port	Enter the port number, and the port number is 37777 by default. The actual port number might differ according to different models.
User Name	Enter the username of the device.
Password	Enter the password of the device.

Step 3 Click **Add**.

You can click **Add and Continue** to add more devices.

5.2.2 Adding Devices in Batches

Background Information

- We recommend you add devices by automatically search when you need to add devices in batches within the same network segment, or when the network segment is known but the exact IP addresses of devices are not known.
- Close ConfigTool and DSS when you configure devices; otherwise, you may not be able to find all devices.

Procedure

Step 1 On the **Device Manager** page, click **Auto Search**.

(+91)-11-41916615
+91-95999-53923

D-162, Okhla Industrial Area
Phase I, New Delhi, 110020

sales@timewatchindia.com
www.timewatchindia.com

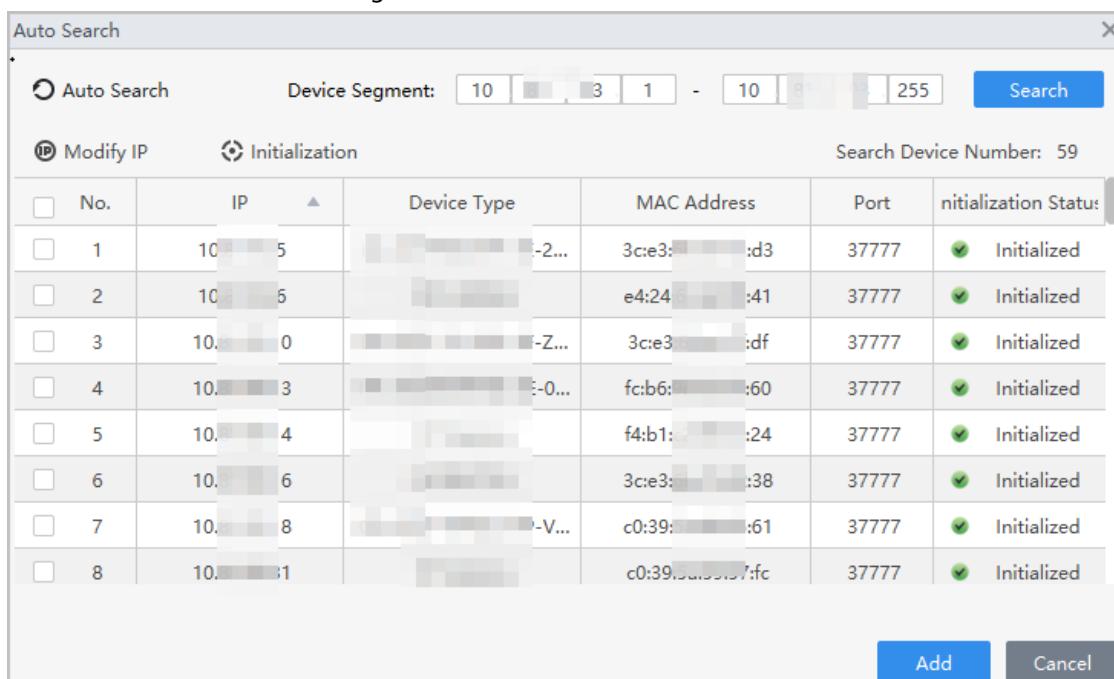

Step 2 Select a search method.

- Auto Search: Enter the username and the password of the device. The system will automatically search for devices that are on the same network to your computer.
- Device Segment Search: Enter the username and the password of the device, and then define the start IP and the end IP. The system will automatically search for devices in this IP range.

You can select both methods for the system to automatically search for devices on the network your computer is connected to and other networks.

Figure 5-2 Search for devices

The screenshot shows a software interface titled 'Auto Search'. It has two tabs: 'Auto Search' (selected) and 'Modify IP'. Under 'Auto Search', there is a 'Device Segment' input field with values 10, 3, 1, - 10, 255, and a 'Search' button. To the right, it says 'Search Device Number: 59'. Below this is a table with columns: No., IP, Device Type, MAC Address, Port, and Initialization Status. The table contains 8 rows of data, each with a checkbox in the first column and a green checkmark in the last column indicating 'Initialized'. At the bottom right are 'Add' and 'Cancel' buttons.

No.	IP	Device Type	MAC Address	Port	Initialization Status
1	10.1.1.5	[REDACTED]-2...	3c:e3:[REDACTED]:d3	37777	Initialized
2	10.1.1.5	[REDACTED]	e4:24:[REDACTED]:41	37777	Initialized
3	10.1.1.0	[REDACTED]-Z...	3c:e3:[REDACTED]:df	37777	Initialized
4	10.1.1.3	[REDACTED]-0...	fc:b6:[REDACTED]:60	37777	Initialized
5	10.1.1.4	[REDACTED]	f4:b1:[REDACTED]:24	37777	Initialized
6	10.1.1.6	[REDACTED]	3c:e3:[REDACTED]:38	37777	Initialized
7	10.1.1.8	[REDACTED]-V...	c0:39:[REDACTED]:61	37777	Initialized
8	10.1.1.1	[REDACTED]	c0:39:[REDACTED]:fc	37777	Initialized

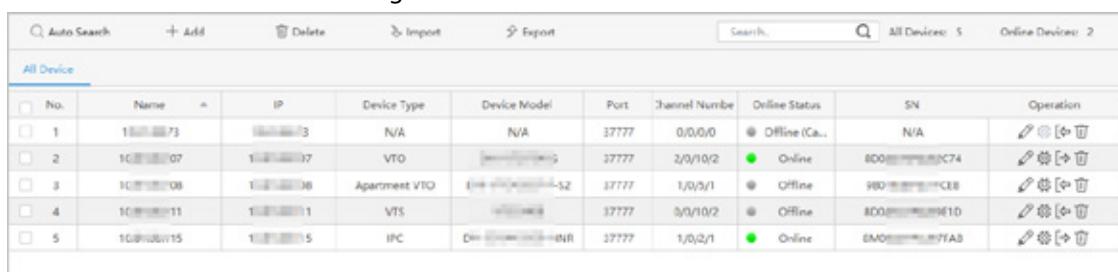

Step 3 Click devices, and then click **Add**.

Step 4 Enter the login user name and password, and then click **OK**.

Result

After the devices are successfully added, they are displayed on this page.

Figure 5-3 Added devices

The screenshot shows a software interface titled 'Added devices'. It has a toolbar with 'Auto Search', '+ Add', 'Delete', 'Import', 'Export', 'Search', 'All Devices: 5', and 'Online Devices: 2'. Below is a table with columns: No., Name, IP, Device Type, Device Model, Port, Channel Number, Online Status, SN, and Operation. The table contains 5 rows of data, each with a checkbox in the first column and a green checkmark in the last column indicating 'Online'. At the bottom right are icons for 'Edit', 'Delete', and 'Import'.

No.	Name	IP	Device Type	Device Model	Port	Channel Number	Online Status	SN	Operation
1	10.1.1.73	10.1.1.3	N/A	N/A	37777	0/0/0/0	Offline (Ca...)	N/A	
2	10.1.1.07	10.1.1.17	VTO	[REDACTED]-G	37777	2/0/10/2	Online	8D0[REDACTED]C74	
3	10.1.1.08	10.1.1.18	Apartment VTO	[REDACTED]-S2	37777	1/0/9/1	Offline	9D0[REDACTED]CEB	
4	10.1.1.11	10.1.1.1	VTS	[REDACTED]	37777	0/0/10/2	Offline	8D0[REDACTED]F1D	
5	10.1.1.15	10.1.1.5	IPC	[REDACTED]-INR	37777	1/0/2/1	Online	8D0[REDACTED]7AB	

5.3 User Management

Add users, assign cards to them, and configure their access permissions.

(+91)-11-41916615

5.3.1 Configuring Card Type

Set the card type before you assign cards to users. For example, if the assigned card is an ID card, set card type to ID card.

Procedure

- Step 1 Log in to Smart PSS Lite.
- Step 2 Click **Access Solution > Personnel Manager > User**.
- Step 3 On the **Card Issuing Type** and then select a card type.

Make sure that the card type is same to the actually assigned card; otherwise, the card number cannot be read.

- Step 4 Click **OK**.

5.3.2 Adding Users

5.3.2.1 Adding Users One by One

Procedure

- Step 1 Select **Personnel > Personnel Manager > Add**.
- Step 2 Enter basic information of staff.
 - 1) Select **Basic Info**.
 - 2) Add basic information of staff.
 - 3) Take snapshot or upload picture, and then click **Finish**.

- The card number can be read automatically or filled in manually. To automatically read card number, select the card reader next to **Card No.**, and then place the card on the card reader. The card number will be read automatically.
- You can select multiple USB cameras to snap pictures.
- Set password
Click **Add** to add the password.
- Configure card
 - a. Click to select **Device** or **Card issuer** as card reader.
 - b. Add cards.
 - c. After adding, you can select the card as main card or duress card, or replace the card with a new one, or delete the card.
 - d. Click to display the QR code of the card.

Only 8-digit card number in hexadecimal mode can display the QR code of the card.

- Configure fingerprint
 - a. Click to select **Device** or **Fingerprint Scanner** as the fingerprint collector.

Figure 5-5 Add extended information

The screenshot shows the 'Add User' dialog box with the 'Extended information' tab selected. The 'Details' section contains the following fields:

- Gender: Male (radio button selected)
- ID Type: ID (dropdown menu)
- Title: Mr (dropdown menu)
- Date of Birth: 1985/3/15
- Company: (empty text field)
- Tel: (empty text field)
- Occupation: (empty text field)
- Email: (empty text field)
- Employment Date: 2022/11/28 19:38:45 (with edit icon)
- Mailing Address: (empty text field)
- Termination Date: 2032/11/29 19:38:45 (with edit icon)
- Administrator: (checkbox)
- Remark: (large text area)

At the bottom of the dialog box are three buttons: 'Add More' (blue), 'Finish' (blue), and 'Cancel' (black).

Step 4 Configure permissions.

- 1) Click  .
- 2) Enter the group name, remarks (optional), and select a time template.
- 3) Select verification methods and doors.

Step 5 Configure permissions. For details, see "5.3.3 Assigning Access Permission".

1. Select **Group**.
2. Enter the group name, remarks (optional), and select a time template.
3. Select verification methods and doors.
4. Click **OK**.

The card number will be read automatically.

- Step 4 Click **OK**.

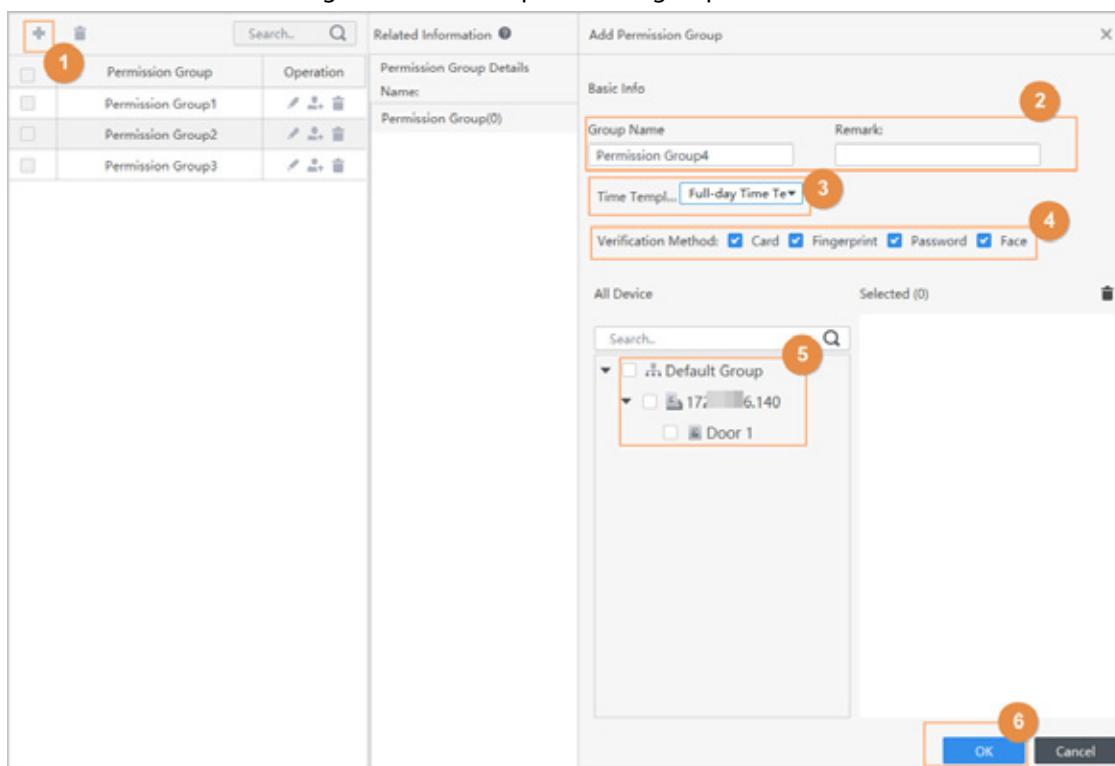

5.3.3 Assigning Access Permission

Create a permission group that is a collection of door access permissions, and then link users with the group so that users can unlock doors associated with the permission group.

Procedure

- Step 1 Click **Access Solution > Personnel Manager > Permission**.
- Step 2 Click .
- Step 3 Enter the group name, remarks (optional), and select a time template.
- Step 4 Select verification methods and doors.
- Step 5 Click **OK**.

Figure 5-8 Create a permission group

- Step 6 Click  of the permission group.
- Step 7 Select users to associate them with the permission group.

Figure 5-9 Add users to a permission group

Step 8 Click **OK**.

Users can unlock the door in this permission group after valid identity verification.

5.3.4 Assigning Attendance Permissions

Create a permission group that is a collection of time attendance permissions, and then associate employees with the group so that they can punch in/out through defined verification methods.

Procedure

- Step 1 Log in to the Smart PSS Lite.
- Step 2 Click **Access Solution > Personnel Manager > Permission configuration**.
- Step 3 Click **+**.
- Step 4 Enter the group name, remarks (optional), and select a time template.
- Step 5 Select the access control device.
- Step 6 Click **OK**.

Step 9 Click **OK**.

5.4 Access Management

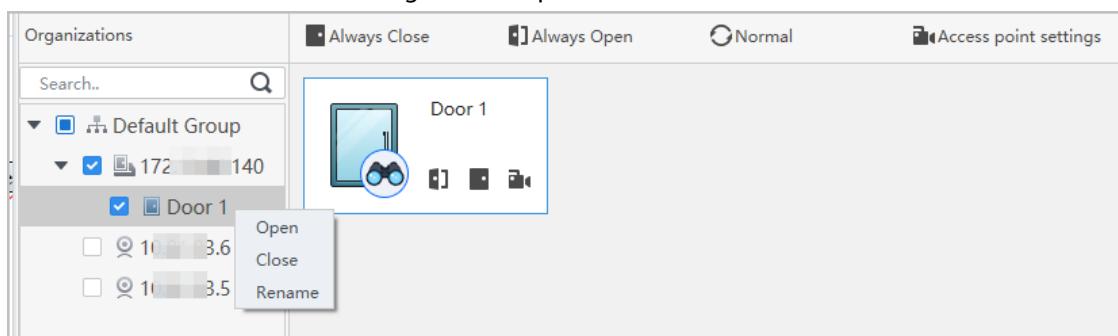

5.4.1 Remotely Opening and Closing Door

You can remotely monitor and control door through the platform. For example, you can remotely open or close the door.

Procedure

- Step 1 Click **Access Solution > Access Manager** on the home page.
- Step 2 Remotely control the door.
 - Select the door, right click and select **Open** or **Close** to open or close the door.

Figure 5-12 Open door

- : Open or close the door.
- : View the live video of the door.

Related Operations

- Event filtering: Select the event type in the **Event Info**, and the event list displays the selected event type, such as alarm events and abnormal events.
- Event refresh locking: Click  to lock the event list, and then event list will stop refreshing. Click  to unlock.
- Event deleting: Click  to clear all events in the event list.

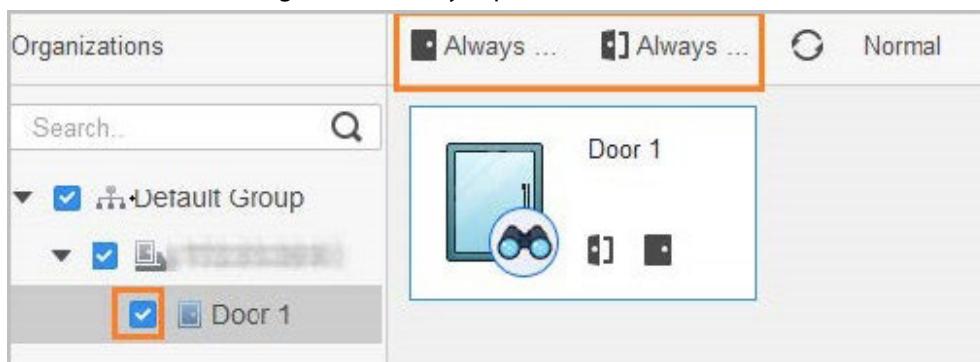

5.4.2 Setting Always Open and Always Close

After setting always open or always close, the door remains open or closed all the time.

Procedure

- Step 1 Click **Access Solution > Access Manager** on the Home page.
- Step 2 Click **Always Open** or **Always Close** to open or close the door.

Figure 5-13 Always open or close

The door will remain open or closed all the time. You can click **Normal** to restore the access control to normal status, and then the door will be open or closed based on the configured verification methods.

5.4.3 Monitoring Door Status

Procedure

- Step 1 Click **Access Solution > Access Manager** on the home page.
 - Step 2 Select the device in the device tree, and right click the device and then select **Start Real-time Event Monitoring**.
- Real-time access control events will display in the event list.

Click Stop Monitor, real-time access control events will not display.

Appendix 1 Important Points of Face Registration

Before Registration

- Glasses, hats, and beards might influence face recognition performance.
- Do not cover your eyebrows when wearing hats.
- Do not change your beard style greatly if you use the Device; otherwise face recognition might fail.
- Keep your face clean.
- Keep the Device at least 2 meters away from light source and at least 3 meters away from windows or doors; otherwise backlight and direct sunlight might influence face recognition performance of the access controller.

During Registration

- You can register faces through the Device or through the platform. For registration through the platform, see the platform user manual.
- Make your head center on the photo capture frame. The face image will be captured automatically.

- Do not shake your head or body, otherwise the registration might fail.
- Avoid 2 faces appear in the capture frame at the same time.

Face Position

If your face is not at the appropriate position, face recognition accuracy might be affected.

(+91)-11-41916615

sales@timewatchindia.com
www.timewatchindia.com

The face position below is for reference only, and might differ from the actual situation.

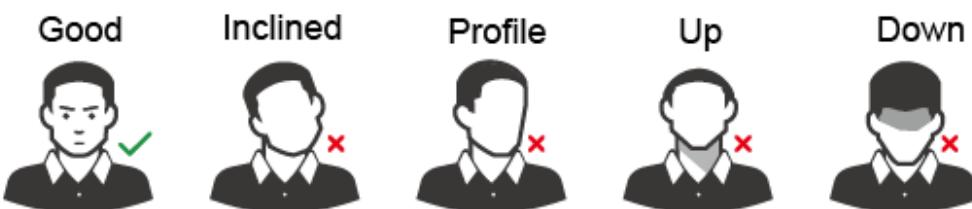

Appendix Figure 1-1 Appropriate face position

Requirements of Faces

- Make sure that the face is clean and forehead is not covered by hair.
- Do not wear face masks, glasses, hats, heavy beards, or other face ornaments that influence face image recording.
- With eyes open, without facial expressions, and make your face toward the center of camera.
- When recording your face or during face recognition, do not wear face masks, and do not keep your face too close to or too far from the camera.

Appendix Figure 1-2 Head position

Appendix Figure 1-3 Face distance

Good

Too Close

Too Far

- When importing face images through the management platform, make sure that image resolution is within the range from 150 × 300 pixels to 600 × 1200 pixels. It is recommended that the resolution be greater than 500 × 500 pixels, the image size be less than 100 KB, and the image name and person ID be the same.
- Make sure that the face takes up more than 1/3 but no more than 2/3 of the whole image area, and the aspect ratio does not exceed 1:2.

Appendix 2 Important Points of Fingerprint Registration Instructions

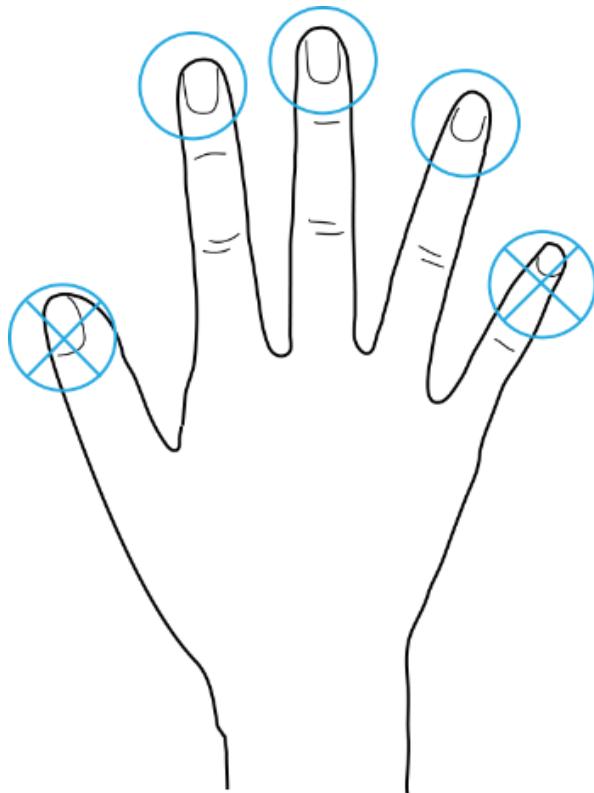

When you register the fingerprint, pay attention to the following points:

- Make sure that your fingers and the scanner surface are clean and dry.
- Press your finger on the center of the fingerprint scanner.
- Do not put the fingerprint sensor in a place with intense light, high temperature, and high humidity.
- If your fingerprints are unclear, use other unlocking methods.

Fingers Recommended

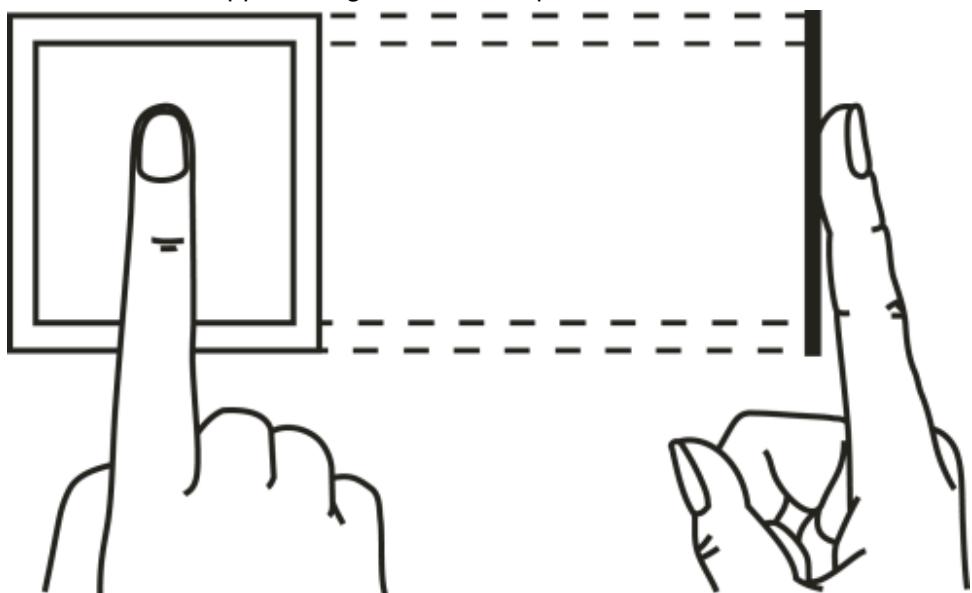

Forefingers, middle fingers, and ring fingers are recommended. Thumbs and little fingers cannot be put at the recording center easily.

Appendix Figure 2-1 Recommended fingers

Appendix 3 Security Recommendation

Account Management

1. Use complex passwords

Please refer to the following suggestions to set passwords:

- The length should not be less than 8 characters;
- Include at least two types of characters: upper and lower case letters, numbers and symbols;
- Do not contain the account name or the account name in reverse order;
- Do not use continuous characters, such as 123, abc, etc.;
- Do not use repeating characters, such as 111, aaa, etc.

2. Change passwords periodically

It is recommended to periodically change the device password to reduce the risk of being guessed or cracked.

3. Allocate accounts and permissions appropriately

Appropriately add users based on service and management requirements and assign minimum permission sets to users.

4. Enable account lockout function

The account lockout function is enabled by default. You are advised to keep it enabled to protect account security. After multiple failed password attempts, the corresponding account and source IP address will be locked.

5. Set and update password reset information in a timely manner

The device supports password reset function. To reduce the risk of this function being used by threat actors, if there is any change in the information, please modify it in time. When setting security questions, it is recommended not to use easily guessed answers.

Service Configuration

1. Enable HTTPS

It is recommended that you enable HTTPS to access web services through secure channels.

2. Encrypted transmission of audio and video

If your audio and video data contents are very important or sensitive, it is recommended to use encrypted transmission function in order to reduce the risk of your audio and video data being eavesdropped during transmission.

3. Turn off non-essential services and use safe mode

If not needed, it is recommended to turn off some services such as SSH, SNMP, SMTP, UPnP, AP hotspot etc., to reduce the attack surfaces.

If necessary, it is highly recommended to choose safe modes, including but not limited to the following services:

- SNMP: Choose SNMP v3, and set up strong encryption and authentication passwords.
- SMTP: Choose TLS to access mailbox server.
- FTP: Choose SFTP, and set up complex passwords.
- AP hotspot: Choose WPA2-PSK encryption mode, and set up complex passwords.

4. Change HTTP and other default service ports

(+91)-11-41916615
 +91-95999-53923

D-162, Okhla Industrial Area
 Phase I, New Delhi, 110020

sales@timewatchindia.com
 www.timewatchindia.com

It is recommended that you change the default port of HTTP and other services to any port between 1024 and 65535 to reduce the risk of being guessed by threat actors.

Network Configuration

1. Enable Allow list

It is recommended that you turn on the allow list function, and only allow IP in the allow list to access the device. Therefore, please be sure to add your computer IP address and supporting device IP address to the allow list.

2. MAC address binding

It is recommended that you bind the IP address of the gateway to the MAC address on the device to reduce the risk of ARP spoofing.

3. Build a secure network environment

In order to better ensure the security of devices and reduce potential cyber risks, the following are recommended:

- Disable the port mapping function of the router to avoid direct access to the intranet devices from external network;
- According to the actual network needs, partition the network: if there is no communication demand between the two subnets, it is recommended to use VLAN, gateway and other methods to partition the network to achieve network isolation;
- Establish 802.1x access authentication system to reduce the risk of illegal terminal access to the private network.

Security Auditing

1. Check online users

It is recommended to check online users regularly to identify illegal users.

2. Check device log

By viewing logs, you can learn about the IP addresses that attempt to log in to the device and key operations of the logged users.

3. Configure network log

Due to the limited storage capacity of devices, the stored log is limited. If you need to save the log for a long time, it is recommended to enable the network log function to ensure that the critical logs are synchronized to the network log server for tracing.

Software Security

1. Update firmware in time

According to the industry standard operating specifications, the firmware of devices needs to be updated to the latest version in time in order to ensure that the device has the latest functions and security. If the device is connected to the public network, it is recommended to enable the online upgrade automatic detection function, so as to obtain the firmware update information released by the manufacturer in a timely manner.

2. Update client software in time

It is recommended to download and use the latest client software.

Physical Protection

It is recommended that you carry out physical protection for devices (especially storage devices), such as placing the device in a dedicated machine room and cabinet, and having access control and
